CATEGORIA - APRESENTANDO PRODUTO MÃO

—----------

Gancho oculos + CTA

use a modelo sempre com o oculos nessa posição. se quiser que apareça um oculos especifico adicione a foto da modelo + a do oculos no seu gerador de video.

Comece exatamente com a imagem de referência.

A modelo está com os óculos escuros presos no cabelo como acessório.

Ela olha para a câmera, retira os óculos do cabelo com uma das mãos e coloca-os naturalmente no rosto. Em seguida, olha para a câmera e dá um sorriso natural e confiante.

BEIJO

Ela leva a MESMA mão até os lábios para mandar um beijo.

A mão deve estar ABERTA, com os dedos juntos e relaxados, posicionada delicadamente na frente dos lábios.

Ela manda um beijo para a câmera com a mão aberta.

NÃO fechar a mão.

NÃO formar um punho.

NÃO levantar o dedo indicador durante o beijo.

CTA — ROTAÇÃO DA MÃO É OBRIGATÓRIA

Depois que o beijo terminar, ela afasta a mão dos lábios.

Em seguida, ela faz uma ROTAÇÃO NATURAL DA MESMA MÃO, girando o punho para mudar a orientação da palma.

A mão deve GIRAR PARA BAIXO.

Durante essa rotação, a palma que estava voltada para os lábios/câmera passa a ficar VOLTADA PARA BAIXO.

Somente depois de completar essa rotação, ela estende o dedo indicador.

Com a palma da mão voltada para baixo e o dedo indicador estendido, ela aponta claramente PARA BAIXO, em direção à parte inferior da tela, indicando um botão ou link de compra.

O gesto final deve ser claramente visível e mantido por um breve instante.

SEQUÊNCIA EXATA

MÃO ABERTA NOS LÁBIOS

→ MANDA O BEIJO

→ AFASTA A MÃO

→ GIRA O PUNHO

→ PALMA FICA VOLTADA PARA BAIXO

→ ESTENDE O DEDO INDICADOR

→ APONTA CLARAMENTE PARA BAIXO

→ SEGURA A CTA POR UM INSTANTE.

A rotação da mão deve ser visível e natural.

IMPORTANTE:

A CTA DEVE SER FEITA COM A MESMA MÃO USADA PARA O BEIJO.

Não trocar de mão.

Não usar a outra mão.

Não apontar durante o beijo.

Não estender o indicador antes da rotação.

Não apontar para cima.

Não apontar para a câmera.

Não apontar para os lábios.

O objetivo é terminar com a mão virada para baixo e o dedo indicador apontando claramente para a parte inferior da tela.

MOVIMENTOS:

Naturais, suaves, femininos e humanizados, como uma pessoa real gravando um vídeo de TikTok. Sem movimentos robóticos ou exagerados.

Exatamente duas mãos e dois braços.

Não criar mãos extras.

Não criar dedos extras.

Dedos anatomicamente corretos.

Não falar e não mexer os lábios como se estivesse falando.

Preservar exatamente a identidade da modelo, rosto, cabelo, corpo, roupa, óculos, cenário, iluminação e enquadramento da imagem original.

Sem cortes, sem transições e sem objetos novos.

Formato vertical 9:16.

—----------

UGC oculos

💡

neutro para qualquer oculos

A câmera permanece completamente fixa, mantendo exatamente o mesmo enquadramento e iluminação natural da imagem de referência.

Sem fala. Sem áudio. Sem lip sync.

A personagem grava um vídeo em frente ao espelho segurando o celular sempre na mesma mão da imagem de referência. O celular nunca troca de mão durante toda a cena.

Ela caminha naturalmente até ficar bem próxima do espelho, aproximando o rosto da câmera.

Mantendo o olhar voltado para o próprio reflexo, usa apenas a mão livre para abaixar levemente os óculos uma única vez, revelando os olhos por cima das lentes.

Ela encara o espelho com um olhar divertido e provocador, faz um sorriso de canto de boca em tom de deboche, olha rapidamente para a frase da camiseta e volta imediatamente a olhar para o espelho.

Sem mover novamente os óculos, ela solta uma risada silenciosa, apenas com a expressão do rosto, mantendo um ar leve e espontâneo.

A cena termina com ela ainda bem próxima do espelho, olhando por cima dos óculos e sustentando um sorriso divertido.

IMPORTANTE
Plano sequência único.
Nenhum corte.
Nenhum zoom.
Câmera totalmente estática.
O celular permanece sempre na mesma mão.
Nunca trocar o celular de mão.
Os óculos são abaixados apenas uma vez.
Não tocar na roupa.
Não criar mãos extras.
Movimentos naturais e humanos.
Aparência UGC ultra-realista em 4K.

—----------

UGC capinha celular

A câmera permanece completamente fixa, mantendo exatamente o mesmo enquadramento da imagem de referência. O celular já está muito próximo da câmera, ocupando a maior parte do enquadramento, com a capinha totalmente visível e centralizada. O rosto da modelo aparece parcialmente atrás do celular, mantendo um sorriso leve e natural.

A câmera mantém o foco travado na capinha durante toda a cena. A capinha permanece extremamente nítida e rica em detalhes, enquanto o rosto da modelo e o fundo ficam levemente desfocados por uma profundidade de campo natural (bokeh), como em uma gravação profissional de produto. O foco nunca muda para o rosto.

Sem fala.

Sem áudio.

Sem lip sync.

Ela segura o celular sempre com a mesma mão, sem trocar de mão em nenhum momento. O celular permanece completamente estável durante toda a gravação.

Com a mão livre, ela aproxima delicadamente as pontas das unhas da capinha e começa a fazer leves batidinhas (finger tapping) sobre a superfície da capinha, alternando naturalmente entre a região central, o aro magnético e as laterais. Em seguida, desliza suavemente as unhas sobre a capinha, valorizando o acabamento, o brilho e os detalhes do produto.

Durante toda a apresentação, ela mantém um sorriso discreto e continua olhando para o próprio reflexo no espelho, transmitindo naturalidade e elegância.

A capinha permanece totalmente visível durante toda a cena, sem ser coberta pelos dedos. Apenas a mão livre realiza os movimentos.

Movimentos suaves, humanos e espontâneos, com aparência de vídeo UGC premium, ultra-realista em 4K.

IMPORTANTE: Nunca trocar o celular de mão. Nunca criar uma terceira mão. Nunca deformar dedos, unhas, braços ou celular. Nunca alterar o design da capinha. Manter exatamente o enquadramento da imagem de referência, com o produto sempre como protagonista da cena.

CTA celular/capinha VERSAO 2

💡
pode usar tanto para cta normal quanto para divulgar capinha

A câmera permanece completamente fixa, mantendo exatamente o mesmo enquadramento da imagem de referência. O celular continua muito próximo da câmera, ocupando a maior parte do enquadramento, com a capinha totalmente visível e o rosto da modelo aparecendo parcialmente ao fundo.

A câmera mantém o foco travado na capinha durante toda a cena. A capinha permanece perfeitamente nítida, enquanto o rosto da modelo e o fundo ficam levemente desfocados por uma profundidade de campo natural, destacando o produto.

Sem fala.

Sem áudio.

Sem lip sync.

Ela segura o celular sempre com a mesma mão durante toda a gravação. O aparelho permanece estável e com a traseira totalmente voltada para a câmera, sem nunca trocar de mão ou esconder a capinha.

Com a mão livre, ela aproxima delicadamente a ponta dos dedos dos lábios e envia um beijo suave para a câmera em um único movimento contínuo e natural. Logo após o beijo, sem interromper a gravação, ela sorri de forma espontânea e utiliza essa mesma mão para formar apenas metade de um coração (meio coração), posicionando-o delicadamente ao lado da capinha, sem cobrir o produto.

Ela mantém o meio coração por um breve instante enquanto olha para o próprio reflexo no espelho com um sorriso leve e carismático. A capinha permanece totalmente visível e continua sendo o foco principal da cena.

Movimentos lentos, elegantes, fluidos e extremamente humanos, com aparência de vídeo UGC premium ultra-realista em 4K.

IMPORTANTE: Nunca trocar o celular de mão. Nunca criar uma terceira mão. Nunca deformar dedos, unhas, braços ou celular. Nunca cobrir a capinha com a mão durante o beijo ou o gesto de meio coração. O celular permanece sempre na mesma posição, com a traseira voltada para a câmera e o foco travado na capinha durante toda a gravação.

UGC limpando rosto

💡

use a aba troca de imagem para deixar sua modelo na mesma pose da imagem referencia

Utilize a imagem de referência apenas para preservar exatamente a identidade da influencer, o cenário, a iluminação, a roupa, a faixa de cabelo, o disco de algodão e toda a composição da cena.

A cena inicia exatamente no enquadramento da imagem de referência, com a influencer muito próxima da câmera, segurando o disco de algodão umedecido já encostado no rosto. A câmera permanece completamente fixa durante toda a animação.

Ela inicia a aplicação deslizando o disco suavemente pela bochecha direita, fazendo movimentos lentos, circulares e extremamente naturais. Em seguida, passa delicadamente pelo nariz, contornando as laterais e a ponta, mantendo sempre o disco totalmente apoiado sobre a pele.

Logo depois, ela desliza o algodão pela bochecha esquerda, repetindo movimentos suaves e contínuos, demonstrando uma aplicação completa e cuidadosa.

Na sequência, ela leva o disco até a testa, realizando movimentos horizontais e circulares por toda a região, como parte de uma rotina real de skincare. Em seguida, passa delicadamente pela região do queixo e linha da mandíbula, completando toda a aplicação de forma uniforme.

Durante toda a sequência, a pele apresenta aparência bem cuidada, hidratada, uniforme e saudável, com textura natural. A pele fica visualmente mais lisa, luminosa e viçosa, porém sem perder completamente os poros naturais, evitando qualquer aspecto plastificado ou artificial.

Os movimentos das mãos são extremamente humanos, suaves e precisos, com pequenas microvariações naturais dos dedos, exatamente como uma pessoa aplicando um tratamento facial em casa.

Ela mantém uma expressão leve, relaxada e confiante durante toda a aplicação, alternando discretamente o olhar entre a câmera e o local onde está passando o disco.

O foco permanece extremamente nítido na pele e no disco de algodão, destacando a sensação de limpeza, hidratação e cuidado, enquanto o fundo permanece suavemente desfocado, reforçando o aspecto premium de um vídeo UGC profissional.

Ao finalizar, ela realiza uma última passada delicada pela bochecha, afasta levemente o disco do rosto e exibe uma pele visivelmente mais uniforme, iluminada, hidratada e bem cuidada, mantendo uma expressão satisfeita e natural.

IMPORTANTE:

Não alterar o rosto, cabelo, maquiagem, faixa de cabelo, roupa ou cenário.
Preservar exatamente o disco de algodão da referência.
O disco permanece sempre em contato com a pele durante a aplicação.
Passar por todo o rosto: bochechas, nariz, testa, queixo e mandíb

—----------

UGC passando perfume

💡
use com qualquer perfume

Mantenha EXATAMENTE a imagem inicial.

A personagem continua segurando o MESMO pequeno Hair Mist que já está na mão.

Primeiro, ela retira a tampa do próprio frasco.

Depois, ela começa a borrifar o Hair Mist pelo cabelo TODO.

Ela direciona o borrifador para diferentes partes do cabelo solto, fazendo borrifadas curtas e naturais:
primeiro no lado esquerdo, depois no centro e depois no lado direito do cabelo.

Ela movimenta suavemente o mesmo frasco para alcançar todo o comprimento dos fios, como uma pessoa realmente aplicando perfume capilar.

O spray aparece somente como uma névoa fina e discreta.

IMPORTANTE:
Durante toda a cena existe APENAS UM FRASCO.
Usar exatamente o pequeno Hair Mist da imagem inicial.
Não duplicar o frasco.
Não criar outro frasco.
Não trocar o produto.
Não deformar a embalagem.
Não alterar o rótulo ou o tamanho.
Não adicionar nenhum outro produto.

A aplicação é SOMENTE no cabelo inteiro.
Não borrifar no rosto, pescoço ou corpo.

Manter exatamente o mesmo rosto, cabelo, camisola, cenário e enquadramento.

Movimentos suaves, naturais e humanizados.

UGC pacote

💡

Neutro para qualquer camiseta! Crie primeiro a imagem da peça de referência já no saco transparente junto com sua modelo + adicione a foto do produto no seu gerador de vídeo.

After opening the package, the model looks inside with visible curiosity. The right hand reaches naturally into the package while the left hand holds and supports it. She grasps the product and slowly pulls it out. The item slides out naturally without clipping or tearing. Once fully out, she holds it toward the camera at chest height. If clothing, she unfolds it naturally using both hands, gravity opening the fabric. The garment hangs naturally. She gives it one small natural shake to show the fabric. No speaking.

Negative: no product clipping through package, no item changing appearance when removed, no speaking, no lip sync, no product morphing

---

UGC pasta de dente

💡

Neutro para qualquer pasta de dente!

{
  "prompt": "Ultra-realistic TikTok-style toothpaste product video, single continuous 10-second scene. Use the provided reference image as the absolute visual source. Keep exactly the same person, toothpaste tube, product box, environment, lighting, clothing, face, hair and camera framing from the reference image. The toothpaste and packaging must remain 100% identical to the reference throughout the entire video. Do not redesign, recolor, rename or modify any product detail. Start with the person holding the original toothpaste box close to the camera. During the first 3 seconds, she naturally and delicately opens the box and smoothly removes the toothpaste tube from inside. From seconds 3 to 7, she holds the toothpaste tube in one hand and the original box in the other, bringing them slightly closer to the camera and gently rotating the tube to show the product while keeping the packaging clearly visible. From seconds 7 to 10, she returns both products facing the camera, smiles naturally and makes a subtle presenting gesture toward them. Movements must be smooth, realistic and continuous, with natural hand physics and no cuts or sudden transitions. Keep the product sharp, readable and prominently visible. Premium realistic smartphone TikTok video quality. Audio in Brazilian Portuguese, spoken naturally and enthusiastically: \"Gente, olha essa pasta de dente! Olha só os detalhes. Se você quiser experimentar também, é só clicar no link e garantir a sua!\"",

"aspect_ratio": "9:16",
"duration": 10,
"audio": true,
"language": "pt-BR",
"reference_instructions": "The reference image is the single source of truth. Preserve exactly the same person, toothpaste tube, box, packaging artwork, printed details, colors, proportions, cap, environment, lighting and clothing. Never invent, replace or modify product details.",
"negative_instructions": "Do not change the toothpaste brand, packaging, colors, typography, printed design, tube shape, cap, box, person, face, hair, clothing or environment. Do not invent text, graphics or claims on the product. Do not add extra products. Do not make the toothpaste appear from nowhere. No scene cuts, product morphing, packaging transformation, subtitles, captions, floating text, watermarks, distorted fingers, extra fingers, malformed hands, distorted face, warped packaging or product deformation."
}

—----------

Prompt fone grande

💡

use sempre a foto da modelo com a caixa na mao e com o fone no ouvido ja

Vertical 9:16, 8-second ultra-realistic cinematic smartphone video, natural daylight in a beautiful green park. The woman must remain 100% identical to the reference image, including her face, hairstyle, body proportions, skin tone, outfit, accessories, and every facial detail. The product box and the headphones must remain 100% identical to the reference, including brand, colors, proportions, shape, buttons, textures, materials, logos, and every design detail. Do NOT modify, recreate, simplify, or replace any product details.

Scene sequence:

0–2s: The woman smiles naturally while holding the headphone box with both hands, presenting it directly toward the camera. She gently tilts the box left and right so every detail can be seen while maintaining eye contact.

2–4s: She slowly brings the box closer to the camera until it completely covers the lens, creating a perfectly smooth full-frame transition. The box must fully block the camera before the scene changes.

4–6s: As the box moves away from the lens, she is now wearing the exact same headphones from the reference. She smiles naturally and lightly nods her head as if enjoying the music. Her movements are subtle and realistic.

6–8s: She slowly turns about 45 degrees to the side, allowing the camera to clearly show the headphones on her ear. She gently touches one earcup with one hand as if adjusting it, then looks back toward the camera with a satisfied smile while continuing to enjoy the music.

The camera remains stable with smooth cinematic movement. Realistic body physics, realistic hair movement, natural lighting, shallow depth of field, no jump cuts, no camera shake, no scene changes except for the box transition, no text, no subtitles, no watermark, no audio, no extra people, no object deformation, no duplicated limbs or fingers. Maintain perfect consistency of the woman's appearance, the product box, and the headphones throughout the entire video.
fala em portugues: Se você corre, faz um favor: testa um fone grande. Mudou totalmente meus treinos. e ainda encontrei na promoção confere no carrinho

pov unhas

UNIVERSAL CINEMATIC FINISHED MANICURE IMAGE — BOTH HANDS / EXACT NAIL POLISH SHADE / PREMIUM CLEAN WHITE TABLE / PERFECT HUMAN NAIL REALISM

Use the attached nail polish image as the only and absolute product reference.

Preserve the same premium clean white living-room table, manicure setup, beautiful Brazilian home, hand identity, jewelry, and lighting established in the previous images.

Create one ultra-photorealistic cinematic vertical 9:16 first-person POV beauty image showing both feminine hands after the manicure is fully completed.

All visible fingernails must be professionally painted with the EXACT color and finish of the attached nail polish.

ABSOLUTE PRODUCT LOCK

Preserve the exact nail polish bottle beside the hands:

- same bottle
- same cap
- same proportions
- same label
- same logo
- same typography
- same visible liquid shade
- same glass
- same finish
- same packaging details

Do not redesign or replace the bottle.

EXACT COLOR AND FINISH LOCK — HIGHEST PRIORITY

The completed nails must exactly match the attached polish in:

- hue
- undertone
- saturation
- brightness
- depth
- opacity
- transparency

- shimmer
- glitter particle color
- metallic effect
- pearlescent effect
- glossy finish
- satin finish
- or matte finish

Do not generate a generic nail color.

Do not modify the shade to flatter the skin, jewelry, table, or environment.

The bottle and nails must display the same color identity under the same neutral lighting.

FINISHED MANICURE QUALITY

Show a beautiful professional manicure with realistic human characteristics:

- uniform color
- smooth coverage
- clean cuticle line
- natural nail curvature
- symmetrical but not digitally identical nail shapes
- approximately 0.5-millimeter natural cuticle spacing when appropriate
- no polish on skin
- no bubbles
- no streaks
- no pooling
- no chips
- no uneven edges
- no excessive thickness
- no synthetic plastic coating

For glossy polish, show controlled natural highlights.

For matte polish, show an even velvety finish.

For shimmer, glitter, metallic, or pearl polish, reproduce the exact particle scale, density, color, and reflective behavior.

HAND POSE

Both hands rest elegantly on the premium white table.

Use a natural attractive pose:

- fingers gently extended
- subtle overlap or soft fan arrangement

- nails facing the camera
- wrists relaxed
- no rigid mannequin pose

Place the exact bottle naturally beside or between the hands with its label visible.

Do not let the bottle cover the nails.

HUMAN REALISM

Show:

- exactly five fingers on each hand
- natural finger proportions
- real skin pores
- subtle veins
- fine skin lines
- realistic cuticles
- natural nail thickness
- authentic nail curvature
- subtle human asymmetry
- real contact shadows

Use the same delicate rings and bracelet.

No extra fingers.

No deformed nails.

ENVIRONMENT LOCK

Maintain:

- same premium white table
- same manicure tools
- same acetone
- same cotton pads
- same manicure case
- same secondary nail polishes
- same elegant home decor
- same lighting
- same color palette
- same scene organization

The environment remains organized and secondary.

COMPOSITION

- vertical 9:16
- close top-down POV
- hands and nails occupy most of the frame
- all painted nails clearly visible
- exact polish bottle visible nearby
- white table texture readable
- manicure accessories subtly present
- elegant home context softly recognizable

CAMERA

- cinematic 4K macro beauty realism
- 70mm to 100mm equivalent lens
- natural top-down perspective
- minimal distortion
- no fisheye

FOCUS

Keep sharply detailed:

- every nail
- cuticle lines
- exact polish finish
- highlights or matte surface
- fingers
- rings
- bottle label
- immediate table texture

No artificial blur across the hands.

LIGHTING

Use neutral, high-color-accuracy beauty lighting.

The bottle and nails must be illuminated consistently.

No color cast.

No excessive reflection hiding the nail shade.

NEGATIVE PROMPT

wrong nail color, color mismatch between bottle and nails, generic manicure, different shade, changed finish, polish on skin, flooded cuticles, chips, bubbles, streaks, uneven coverage, acrylic plastic nails, deformed nails, extra fingers, missing fingers, fused fingers, different

hand identity, excessive jewelry, bottle covering nails, changed table, changed environment, CGI, 3D render, AI artifacts, captions, subtitles, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic vertical POV image showing both realistic feminine hands resting elegantly on the same premium clean white living-room manicure table, with every nail professionally painted in the EXACT shade and finish of the attached nail polish, accompanied by the exact bottle, refined jewelry, authentic skin and cuticle microtexture, perfect but physically human manicure quality, and absolutely no visible AI traits.

—----------

POV esmalte

UNIVERSAL CINEMATIC NAIL POLISH APPLICATION VIDEO — PROFESSIONAL MACRO B-ROLL / SAME PREMIUM WHITE TABLE / EXACT SHADE AND BRUSH LOCK / SILENT POV

Use the approved application image as the immutable first-frame anchor.

Use the original attached nail polish image as the only and absolute product reference.

Create one ultra-photorealistic cinematic vertical 9:16 first-person POV manicure video showing the woman professionally applying the EXACT attached nail polish to one hand.

FORMAT

- vertical 9:16
- 8 seconds
- 24 fps
- exactly four close B-roll scenes
- clean editorial cuts
- professional cinematic realism
- no dialogue
- no narration
- no voice-over
- no music
- no subtitles
- no text overlays

ENVIRONMENT LOCK

Preserve exactly:

- same premium clean white table
- same living room
- same manicure accessories

- same acetone
- same cotton pads
- same tools
- same secondary nail polishes
- same jewelry
- same hands
- same lighting
- same scene organization

All shots occur during the same manicure session.

ORIGINAL PRODUCT RESET RULE

At the beginning of every shot, reconstruct the nail polish directly from the original attached product image.

Preserve independently in every scene:

- same bottle
- same cap
- same brush
- same stem
- same brush width
- same bristles
- same label
- same polish shade
- same viscosity
- same opacity
- same finish

No product drift.

No brush drift.

No shade drift.

EXACT SHADE TRANSFER LOCK

The polish visible in the bottle, on the brush, and on every painted nail must remain exactly the same color.

No hue shift.

No undertone shift.

No lighter or darker nail result.

No generic shade replacement.

B-ROLL STRUCTURE

SHOT 1 — 0.0s TO 1.8s — BRUSH LOADING DETAIL

Use an extreme close-up of the exact brush being slowly lifted from the open bottle.

Show:

- exact brush shape
- controlled polish amount
- real product viscosity
- subtle excess being wiped against the inner bottle neck
- exact visible color
- realistic wet reflections

No dripping.

No excessive product accumulation.

SHOT 2 — 1.8s TO 3.8s — CENTRAL STROKE

Cut to a macro close-up of one natural fingernail.

The brush touches the nail approximately 0.5 to 1 millimeter away from the cuticle.

Apply one smooth central stroke from the nail base toward the free edge.

The color appears exactly where the bristles pass.

Show realistic bristle compression and gradual polish deposition.

SHOT 3 — 3.8s TO 6.0s — SIDE STROKES

Apply one controlled stroke along the left side and one along the right side of the same nail.

Respect the natural nail contour.

Create a thin, even, professional coat.

Do not touch the cuticle or surrounding skin.

The finished nail must show:

- uniform color
- clean edges
- even opacity
- no streaks

- no bubbles
- no pooling
- no smudging

SHOT 4 — 6.0s TO 8.0s — CONTINUED MANICURE

Cut to a second nail or slightly wider macro composition.

The woman continues the same professional three-stroke technique.

Keep the brush, nail, and exact polish color sharply visible.

End with at least two freshly painted nails and the remaining nails still in progress.

Maintain believable manicure continuity.

APPLICATION PHYSICS

Show:

- real brush-to-nail contact
- natural bristle flexibility
- controlled polish viscosity
- progressive coverage
- realistic wet reflections
- stable hand control
- natural finger support
- correct nail curvature
- real cuticle spacing

No instant color appearance.

No nails changing before brush contact.

No floating polish.

No product crossing onto the skin.

HAND REALISM

Maintain two anatomically correct feminine hands with:

- exactly five fingers each
- real skin texture
- natural cuticles
- correct nail beds
- realistic finger joints
- stable precise movement

- same rings and bracelet

No hand identity drift.

No finger morphing.

CAMERA AND FOCUS

Use 85mm to 105mm macro-lens aesthetics.

Keep completely sharp:

- nail
- cuticle
- brush
- bristles
- polish transfer
- wet finish
- contact point

No focus pulsing.

No camera shake.

No blur hiding mistakes.

LIGHTING

Maintain the same neutral lighting from the first image.

The bottle color, brush color, and nail color must match exactly.

No colored reflections altering the shade.

AUDIO

Use only subtle synchronized ASMR sounds:

- brush leaving the bottle
- soft contact with the bottle neck
- gentle brush movement over the nail
- subtle hand movement
- quiet residential room tone

No speech.

NEGATIVE PROMPT

wrong nail polish, changed product, changed brush, changed shade, color mismatch, product morphing, polish appearing before brush contact, complete manicure appearing instantly, brush passing through nail, product on skin, flooded cuticle, streaks, bubbles, uneven coat, clumps, dripping polish, extra fingers, missing fingers, fused fingers, deformed nails, hand morphing, camera shake, blurred application, focus pulsing, CGI, 3D render, AI artifacts, dialogue, narration, subtitles, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic 8-second vertical POV manicure video with four close B-roll scenes showing the exact brush being loaded and the EXACT attached nail polish being professionally applied through precise center and side strokes over the same premium white table, preserving exact shade transfer, clean cuticle spacing, realistic viscosity, natural hands, stable application, and absolutely no visible AI traits.

-

POV esmalte

UNIVERSAL CINEMATIC NAIL POLISH POV VIDEO — PRODUCT CLOSE TO CAMERA / READABLE LABEL / SAME PREMIUM WHITE TABLE / SILENT PRODUCT DETAIL PRESENTATION

Use the approved first image as the immutable first-frame anchor.

Use the original attached nail polish image as the only and absolute product reference.

Create one ultra-photorealistic cinematic vertical 9:16 first-person POV video showing two realistic feminine hands presenting the EXACT attached nail polish above the same premium clean white living-room table.

FORMAT

- vertical 9:16
- 7 seconds
- 24 fps
- one continuous take
- no cuts
- no transitions
- no dialogue
- no narration
- no voice-over
- no music
- no subtitles
- no text overlays

INITIAL-FRAME LOCK

Preserve exactly:

- same white premium table
- same manicure tools
- same acetone
- same cotton pads
- same manicure case
- same secondary nail polishes
- same home environment
- same lighting
- same hands
- same nails
- same rings
- same bracelet
- same scene organization

Do not reorganize the table.

Do not add or remove objects.

ABSOLUTE PRODUCT LOCK

Preserve throughout every frame:

- same exact bottle
- same cap
- same dimensions
- same glass geometry
- same label
- same logo
- same spelling
- same typography
- same graphics
- same polish shade
- same transparency
- same material
- same finish

No product morphing.

No label drift.

No color drift.

No bottle-size change.

ACTION

Both hands remain visible.

One hand holds the bottle while the other lightly stabilizes the base or frames the product.

The hands slowly bring the bottle closer to the camera.

Rotate the bottle only a few controlled degrees until the main label faces the lens directly.

Hold it steady near the camera long enough to clearly inspect:

- label
- logo
- typography
- cap
- bottle shape
- glass thickness
- visible product color
- packaging finish

Do not open the bottle.

Do not shake it aggressively.

Do not cover the label with the fingers.

CAMERA AND FOCUS

Use stable cinematic POV framing.

The focus transitions naturally from the hands and table to the product label.

Finish with the bottle, label, cap, and polish color completely sharp.

No focus pulsing.

No blurred text.

No excessive bokeh.

No wide-angle distortion.

HAND REALISM

Maintain:

- exactly five fingers on each hand
- natural finger movement

- realistic joints
- natural nails
- visible pores
- correct grip pressure
- physically accurate product contact

No finger morphing.

No extra fingers.

No floating bottle.

LIGHTING

Maintain neutral, high-color-accuracy lighting.

The product color must remain identical to the original attached reference.

No warm or colored cast.

No glare hiding the label.

AUDIO

Use only subtle synchronized sounds:

- soft hand movement
- delicate jewelry contact
- faint glass-bottle handling
- restrained residential room tone

No speech.

No whispering.

NEGATIVE PROMPT

changed nail polish, replacement bottle, changed label, misspelled branding, mirrored logo, wrong shade, color shift, product morphing, cap changing, bottle changing size, fingers covering label, excessive rotation, aggressive shaking, opening the bottle, extra hands, extra fingers, deformed hands, unstable camera, unreadable label, artificial blur, focus pulsing, CGI, 3D render, AI artifacts, subtitles, captions, watermark

FINAL OUTPUT

One continuous ultra-photorealistic vertical POV video showing two realistic feminine hands slowly bringing the EXACT attached nail polish close to the camera and presenting its bottle, cap, readable label, typography, exact shade, glass construction, and packaging details in

sharp focus, while preserving the same premium white-table manicure environment and absolutely no visible AI traits.

—----------

Ugc blush

UNIVERSAL UGC VIDEO PROMPT — PRODUCT IN HAND / NEVER RELEASE

Create an ultra-photorealistic vertical UGC video of a female influencer holding the exact product from the attached reference image in one hand while speaking in Brazilian Portuguese. Preserve the product with maximum fidelity: same packaging, label, colors, logo placement, shape, cap, material, proportions, and all visible details.

The influencer holds the product naturally close to the camera and NEVER releases it during the entire video. The product must stay visible, stable, correctly scaled to the hand, and consistently the same in every frame. Natural human movement, authentic UGC style, realistic skin texture, correct hand anatomy, casual home or lifestyle environment, soft natural lighting, vertical 9:16, smartphone realism.

Anti-crash / negative prompt: product disappearing, product leaving frame, product passing through hand, floating product, hand clipping through product, altered packaging, changed label, fake logo, distorted text, product morphing, wrong scale, extra fingers, deformed hand, multiple hands, robotic movement, blurry product, CGI, cartoon, low quality, harsh lighting.

Technical parameters: model: veo-3, length: 8 seconds, resolution: 1080x1920, framerate: 24fps, aspect_ratio: 9:16.

DIÁLOGO EM PORTUGUES DO BRASIL: [ESCREVA A FALA DA SUA INFLUENCER AQUI]

—----------

Ugc blush CENA 1

UNIVERSAL CINEMATIC BLUSH VIDEO — SAME INITIAL-FRAME ENVIRONMENT / EXACTLY TWO B-ROLL SCENES / PRODUCT OPENING + PRECISE CHEEK APPLICATION / SILENT BEAUTY ROUTINE / EXACT SHADE TRANSFER / ABSOLUTE PRODUCT AND FACE LOCK

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the attached blush product.

Use the approved generated image as the immutable first-frame anchor.

Create one ultra-photorealistic cinematic vertical 9:16 beauty video showing the EXACT influencer silently opening and applying the EXACT attached blush.

The influencer never speaks.

She does not narrate.

She does not lip-sync.

She simply performs her makeup routine naturally, opening the blush, loading a real blush brush with the product, removing the excess, and applying it delicately to her cheeks.

The video must contain exactly TWO dedicated B-roll scenes:

1. one product-focused B-roll showing the exact blush packaging being presented and opened naturally;
2. one application-focused B-roll showing the exact blush color being transferred gradually from the brush onto the cheek with delicate upward movements.

FORMAT

- cinematic vertical 9:16
- 8 seconds
- 24 fps
- exactly four connected shots
- exactly two dedicated B-roll shots
- three clean editorial cuts
- professional 4K beauty-commercial realism
- no dialogue
- no narration
- no voice-over
- no lip-sync
- no singing
- no subtitles

- no text overlays
- no music

INITIAL-FRAME ENVIRONMENT LOCK — HIGHEST PRIORITY

Preserve the approved first-frame environment exactly throughout the entire video.

Maintain the same:

- room
- vanity or beauty area
- walls
- furniture
- mirror placement
- decorative objects
- visible background items
- surfaces
- architecture
- color palette
- lighting direction
- lighting intensity
- atmosphere
- outfit
- hairstyle
- accessories
- and overall visual composition

Do not redesign the room.

Do not move furniture.

Do not replace decor.

Do not add new products.

Do not remove existing objects.

Do not change the environment between shots.

All B-roll shots must feel physically captured in the same exact location, during the same makeup session, under the same lighting conditions.

SILENT PERFORMANCE — CRITICAL

The influencer remains completely silent throughout the entire video.

Her lips do not form words.

She does not address the camera.

She does not explain or promote the product.

She does not perform exaggerated sales gestures.

Her expression remains calm, focused, elegant, and naturally concentrated on doing her makeup.

Use only subtle facial movements related to inspecting, opening, loading, and applying the blush.

PRODUCT IDENTIFICATION — FIXED

Treat the attached product specifically as blush.

Do not reinterpret it as:

- bronzer
- contour
- highlighter
- compact powder
- foundation
- eyeshadow
- or another cosmetic category

Use real blush behavior only.

The blush must be applied specifically to the cheek area with a suitable soft blush brush.

REFERENCE PRIORITY

Priority 1: preserve the exact attached blush product.

Priority 2: preserve the exact influencer identity.

Priority 3: preserve the exact initial-frame environment.

Priority 4: reproduce the correct opening mechanism and packaging.

Priority 5: reproduce the exact visible blush shade on the cheek.

Priority 6: preserve realistic brush contact, skin texture, pigmentation, and gradual blending.

If any conflict occurs, simplify camera movement or background detail rather than changing the product, color, face, or environment.

ABSOLUTE BLUSH PRODUCT LOCK

Preserve the attached blush exactly throughout every frame:

- same brand
- same product model
- same compact or container
- same packaging geometry
- same dimensions
- same proportions
- same lid
- same hinge
- same closure
- same base
- same transparent or opaque areas
- same powder pan
- same pan shape
- same visible pressed-product surface

- same logo
- same label
- same lettering
- same spelling
- same typography
- same printed graphics
- same packaging colors
- same blush color
- same undertone
- same finish
- same material
- same gloss level
- and every visible construction detail

Do not redesign, replace, simplify, recolor, mirror, duplicate, enlarge, shrink, or morph the product.

Do not replace it with a similar blush.

Do not create another compact from the same brand.

Do not change the powder pan.

Do not invent extra compartments, mirrors, brushes, puffs, applicators, or accessories unless clearly visible in the original reference.

ORIGINAL PRODUCT RESET RULE

At the beginning of every new shot, reconstruct the blush directly from image 2.

Do not use the generated product from the previous shot as the reference for the next shot.

Every shot must independently match the original attached blush.

No packaging drift.

No logo drift.

No pan-shape drift.

No product-color drift.

No finish drift.

EXACT BLUSH SHADE TRANSFER LOCK — HIGHEST PRIORITY

The exact blush color visible inside the attached packaging must be physically transferred onto the influencer's cheek.

The visible shade on the cheek must clearly correspond to the color inside the blush compact.

Preserve the same:

- hue
- undertone
- saturation
- brightness
- depth
- warmth
- coolness
- opacity
- transparency
- matte finish
- satin finish
- shimmer level
- luminosity
- and overall color identity

Do not reinterpret the blush color.

Do not make it generically pink.

Do not make it peach, coral, rose, mauve, berry, red, brown, terracotta, orange, nude, or another shade unless that exact color is visible in the attached product.

Do not adapt the blush color to the influencer's outfit, skin tone, or environment.

Do not warm, cool, darken, lighten, desaturate, oversaturate, or beautify the shade.

The product color in the compact and the final cheek color must remain visibly related under the same neutral lighting.

REALISTIC SHADE-BUILDING RULE

The blush color must appear gradually through real brush contact.

Do not make the cheek instantly change color.

Do not create a digital color transition.

Do not create the complete result before the brush touches the skin.

The color buildup must happen in physically coherent layers:

1. the brush touches and picks up the exact blush pigment;
2. excess product is lightly removed;
3. the brush touches the cheek;
4. a soft first layer appears exactly where the bristles pass;
5. a second restrained pass gradually strengthens the color;
6. the final shade blends naturally with the influencer's real skin tone and texture.

The blush must be clearly visible but still physically and humanly realistic.

The skin must remain visible beneath the product.

No opaque paint effect.

No artificial colored patch.

No airbrushed digital gradient.

PRE-APPLICATION CHEEK STATE

Before application, keep both cheeks naturally prepared and free from competing blush.

Do not begin with the target blush color already fully visible.

Preserve:

- **natural skin tone**
- **pores**
- **fine texture**
- **subtle natural warmth**
- **and real facial asymmetry**

The viewer must clearly perceive the difference between the untreated cheek area and the gradually powdered cheek area.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly throughout every shot:

- **same facial identity**
- **same face shape**
- **same skin tone**
- **same apparent age**
- **same eyes**
- **same eyebrows**
- **same nose**
- **same lips**
- **same jawline**
- **same cheek structure**
- **same cheekbone placement**
- **same hairstyle**
- **same hair color**
- **same hair texture**
- **same hairline**
- **same hand appearance**

- and same recognizable identity

Do not replace the influencer with another woman during B-roll.

Do not reshape her cheeks.

Do not sharpen or enlarge the cheekbones.

Do not alter her face to exaggerate the blush effect.

No facial drift.

No hairstyle change.

No skin-tone change.

No beauty-filter transformation.

EXACTLY FOUR-SHOT STRUCTURE

SHOT 1 — 0.0s TO 1.4s — SILENT BEAUTY PREPARATION

Start from the approved first-frame composition.

Use the same cinematic close beauty framing from approximately the shoulders upward.

The influencer holds the exact attached blush near her face.

Both the face and product remain sharply visible.

She remains silent and focused.

She briefly looks toward the product and prepares to open it.

Preserve the exact environment, lighting, outfit, hairstyle, and camera angle from the first frame.

This is not a B-roll shot.

No speaking.

No promotional gesture.

SHOT 2 — 1.4s TO 3.4s — B-ROLL 1: SHOWING AND OPENING THE EXACT BLUSH

Cut to the first dedicated B-roll scene.

Focus closely on the influencer's real hands holding and opening the EXACT attached blush packaging.

Show:

- the complete compact or container
- the front packaging
- the visible logo and product details
- real finger placement
- natural pressure on the closure
- the lid opening through the correct mechanism
- realistic hinge resistance
- the exact powder pan being revealed
- and the exact blush color inside the packaging

After opening, she briefly holds the compact at a clear natural presentation angle so the powder surface and packaging remain visible.

The product remains the complete visual focus.

Do not make the compact open by itself.

Do not make the lid disappear.

Do not change the pan shape.

Do not change the blush color.

Do not switch to another product.

Do not reveal unsupported hidden compartments.

SHOT 3 — 3.4s TO 6.8s — B-ROLL 2: DELICATE BLUSH APPLICATION WITH VISIBLE COLOR TRANSFER

Cut to the second dedicated B-roll scene.

Use a close cinematic beauty shot focused on one cheek, the cheekbone, the brush, and the exact point of product transfer.

The influencer herself must remain identifiable as the same person.

Use one real, clean, soft, unbranded blush brush with:

- natural proportional size
- soft rounded or slightly angled bristles
- realistic bristle density
- physically believable handle
- and correct flexibility

The action begins with the brush lightly touching the exact blush pan and picking up a controlled amount of product.

She then gives one or two delicate taps:

- against the edge of the compact
- or lightly against the back of her hand

to remove excess powder.

The tapping must be subtle and physically realistic.

No large powder cloud.

No product explosion.

She slightly turns her face and keeps her head stable.

She positions the brush diagonally at the apple of the cheek.

The brush travels softly upward and outward toward the upper cheekbone and temple.

Use a controlled combination of:

- very light tapping
- short sweeping motions
- soft circular blending
- and restrained upward strokes

The brush must not be dragged forcefully across the face.

The bristles lightly compress against the skin.

The movement is firm enough to control the application but extremely gentle.

The hand remains stable.

No trembling.

No abrupt wrist movement.

The first pass deposits a subtle layer.

The second restrained pass builds the exact shade gradually.

The color must become visible exactly where the brush passes.

The final result must clearly show:

- the exact blush color from the compact
- natural blending with the influencer's skin
- a visible but delicate flush
- soft upward direction
- slightly lifted visual effect
- preserved pores
- preserved skin microtexture

- no harsh border
- and no smudging

Keep enough untreated skin visible around the application area so the viewer can notice the subtle difference between:

- skin without blush
- and skin with the exact blush applied

When composition allows, keep the opposite cheek more neutral during this B-roll to create a realistic visual comparison.

Do not create an artificial split-screen.

Do not exaggerate the difference.

SHOT 4 — 6.8s TO 8.0s — SILENT FINISHED BLUSH RESULT

Return to the exact original close beauty composition from Shot 1.

Preserve the same:

- camera position
- camera angle
- room
- background
- lighting
- outfit
- hairstyle
- facial identity
- and product packaging

The influencer remains completely silent.

She lowers the brush slightly and holds the exact open blush near her face.

She calmly looks toward the camera or a nearby mirror.

The applied cheek must display:

- the exact visible blush shade
- realistic gradual pigmentation
- delicate upward blending
- soft natural edges
- visible skin texture
- subtle healthy color
- and no smudging

The visible blush in the compact and the applied result on the face must be visually consistent.

This is not a B-roll shot.

No speech.

No lip movement forming words.

No promotional gesture.

BLUSH APPLICATION TECHNIQUE — CRITICAL

The application must follow realistic professional blush technique:

1. load the soft brush lightly with the product;
2. remove excess with one or two delicate taps;
3. place the brush around the apple of the cheek;
4. angle the movement upward toward the temple;
5. deposit the first layer with soft tapping;
6. blend using short upward and outward sweeps;
7. build intensity gradually with a second restrained layer;
8. preserve natural skin texture;
9. keep the edges soft and diffused;
10. stop before excessive color accumulation.

Do not apply the full intensity in one pass.

Do not drag the brush downward.

Do not create circular clown-like cheek patches.

Do not apply blush under the jawline.

Do not cover the entire face.

Do not create harsh contour lines.

HUMAN OPENING PHYSICS

Show:

- correct lid movement
- realistic hinge resistance
- natural finger pressure
- controlled wrist movement
- accurate compact weight
- real contact shadows
- and physically coherent product handling

No floating lid.

No disappearing packaging parts.

No product clipping through fingers.

No self-opening compact.

BRUSH AND POWDER PHYSICS

Show:

- realistic brush contact with the powder pan
- subtle bristle movement
- controlled pigment pickup
- minimal excess powder
- believable tap-off behavior
- real bristle compression against the cheek
- gradual pigment transfer

- authentic blending
- physically realistic powder adhesion
- and soft natural diffusion

No excessive airborne powder.

No powder cloud covering the face.

No floating pigment.

No instant color transformation.

No brush passing through the cheek.

No rigid plastic bristles.

HAND REALISM

Maintain:

- exactly five fingers per visible hand
- correct thumb placement
- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible skin pores
- fine skin lines
- correct wrist alignment
- physically believable grip
- accurate contact shadows

No extra fingers.

No fused fingers.

No missing fingers.

No hand morphing.

No impossible grip.

No trembling hand.

SKIN AND FACE REALISM

Show:

- visible skin pores
- fine facial lines
- natural cheek texture
- realistic under-eye texture
- subtle tonal variation
- individual eyebrow hairs
- individual eyelashes
- individual hair strands
- natural eye moisture
- subtle natural facial asymmetry
- realistic skin compression from the brush
- authentic pigment interaction with skin

No waxy skin.

No plastic face.

No artificial glass-skin effect.

No excessive smoothing.

No beauty-filter transformation.

The blush enhances the real skin instead of replacing it.

CAMERA

Shot 1

- cinematic close beauty framing

- 70mm to 85mm equivalent lens
- face and product equally sharp
- natural eye-level angle
- exact approved first-frame composition

B-roll Shot 2

- product-focused close-up
- 85mm to 100mm equivalent lens
- packaging, fingers, hinge, pan, and blush color sharply visible
- product opening is the visual focus

B-roll Shot 3

- application-focused cheek close-up
- 85mm to 105mm equivalent lens
- cheek, cheekbone, brush, bristles, and pigment transfer sharply visible
- close enough to perceive the subtle difference between applied and unapplied skin

Shot 4

- return to the exact original 70mm to 85mm beauty framing
- same camera position
- same angle
- same scene continuity

No aggressive zoom.

No orbit.

No fisheye.

No artificial camera shake.

FOCUS

Shot 2 must focus completely on:

- the exact packaging
- opening mechanism
- powder pan
- and blush color

Shot 3 must focus completely on:

- brush-to-skin contact
- gradual pigment transfer
- cheek texture
- upward application movement
- and the subtle difference between skin with and without blush

Do not shift focus to background decor.

No blurred compact.

No blurred blush pan.

No blurred brush.

No blurred cheek.

No blurred contact point.

No focus pulsing.

No excessive bokeh hiding errors.

COLOR-MANAGED LIGHTING — CRITICAL

Use the exact lighting established in the approved first frame.

Maintain:

- natural skin tones
- exact packaging colors
- exact blush shade
- exact blush undertone

- realistic skin finish
- balanced exposure
- neutral white balance
- high color accuracy
- soft frontal illumination
- subtle lateral shaping
- natural shadows

The blush compact and applied cheek must be illuminated under the same neutral lighting.

Do not allow warm or colored light to change the blush shade.

No pink lighting.

No orange cast.

No red cast.

No blue, green, or purple contamination.

No fake HDR.

No artificial glow.

No dramatic color grading.

AUDIO

No speech.

No narration.

No voice-over.

No music.

Use only subtle synchronized ASMR sounds:

- compact opening
- lid movement
- brush touching the powder
- delicate tap against the compact or hand
- soft bristle movement against the cheek
- light product handling
- quiet room tone

No audible speaking.

No whispers.

No intelligible background voices.

CLEAN FRAME

Outside legitimate branding physically printed on the exact blush, generate no:

- subtitles
- captions
- promotional text
- prices
- floating labels
- social-media interface
- icons
- banners
- unrelated logos
- watermarks

NEGATIVE PROMPT

speaking, dialogue, narration, voice-over, lip-sync, singing, whispering, promotional gestures, more than two B-roll scenes, missing opening B-roll, missing application B-roll, changed initial environment, different room, changed furniture, changed background, changed lighting, changed outfit, changed hairstyle, wrong product category, bronzer effect, contour effect, highlighter effect, compact powder effect, foundation effect, generic blush, changed product, replacement blush, altered compact, changed lid, changed

hinge, changed powder pan, changed packaging, altered logo, mirrored label, misspelled branding, changed blush shade, generic pink cheeks, color mismatch between compact and face, incorrect undertone, warmer result, cooler result, darker result, lighter result, oversaturated cheeks, desaturated blush, instant color change, digital pigment transition, color appearing before brush contact, brush not touching skin, wrong brush type, excessive powder cloud, powder explosion, floating pigment, harsh circular cheek patch, clown blush, sharp edge, unblended color, blush outside cheek area, blush under jawline, downward brush movement, aggressive dragging, exaggerated transformation, erased pores, plastic skin, waxy face, artificial beauty filter, different model during B-roll, facial identity drift, changed skin tone, changed face shape, hand morphing, extra fingers, fused fingers, missing fingers, impossible grip, blurred opening, blurred application, focus pulsing, excessive bokeh, CGI, 3D render, illustration, collage, AI artifacts, subtitles, text overlays, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic 8-second vertical blush video showing the EXACT influencer silently using the EXACT attached blush inside the exact same environment established in the approved first frame.

The video must contain exactly two dedicated B-roll scenes:

1. a product-focused B-roll showing the exact blush packaging in her hands while she presents and opens it naturally, clearly revealing the original powder pan and exact product shade;
2. an application-focused B-roll showing her loading a soft blush brush, delicately removing excess, and applying the exact blush color from the apple of the cheek upward toward the temple using light tapping, short sweeping movements, and gradual layered blending.

The influencer never speaks, narrates, lip-syncs, or performs a verbal product presentation.

The exact color visible in the attached blush packaging must become visibly present on the cheek through real brush contact and gradual pigment transfer, preserving the correct hue, undertone, finish, natural skin texture, subtle difference between applied and unapplied areas, realistic human

anatomy, absolute product identity, absolute influencer identity, and absolutely no visible AI traits.

—----------

Ugc rímel
UNIVERSAL CINEMATIC MASCARA VIDEO — SAME INITIAL-FRAME ENVIRONMENT / EXACTLY TWO B-ROLL SCENES / MASCARA OPENING + ROOT-TO-TIP APPLICATION / SILENT BEAUTY ROUTINE / ABSOLUTE PRODUCT AND FACE LOCK

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the mascara product.

Use the approved generated image as the immutable first-frame anchor.

Create one ultra-photorealistic cinematic vertical 9:16 beauty video showing the EXACT influencer silently opening and applying the EXACT attached mascara.

The influencer never speaks.

She does not narrate.

She does not lip-sync.

She simply performs her makeup routine naturally, opening the mascara and applying it precisely to her eyelashes.

The video must contain exactly TWO dedicated B-roll scenes:

1. one product-focused B-roll showing the exact mascara being opened naturally;
2. one application-focused B-roll showing the mascara wand applying the product from the lash roots to the tips with a controlled micro zig-zag movement.

FORMAT

- cinematic vertical 9:16
- 8 seconds
- 24 fps
- exactly four connected shots
- exactly two dedicated B-roll shots
- three clean editorial cuts
- professional 4K beauty-commercial realism
- no dialogue
- no narration
- no voice-over
- no lip-sync
- no singing
- no subtitles
- no text overlays
- no music

INITIAL-FRAME ENVIRONMENT LOCK — HIGHEST PRIORITY

Preserve the approved first-frame environment exactly throughout the entire video.

Maintain the same:

- room
- vanity or beauty area
- wall colors
- furniture
- mirror placement
- decorative objects
- background cosmetics
- lighting fixtures
- surfaces
- architecture
- camera-facing background
- color palette
- atmosphere
- outfit

- hairstyle
- accessories
- and overall visual composition

Do not redesign the environment.

Do not move furniture.

Do not replace decor.

Do not add new beauty products.

Do not remove existing visible objects.

Do not change the room between shots.

Do not create a studio, bathroom, bedroom, or vanity different from the approved first frame.

All B-roll shots must feel physically captured inside the same exact location, during the same makeup session, under the same lighting conditions.

SILENT PERFORMANCE — CRITICAL

The influencer remains completely silent throughout the entire video.

Her lips do not form words.

She does not address the camera.

She does not explain the product.

She does not perform promotional gestures.

Her expression is calm, focused, precise, and naturally concentrated on applying mascara.

Use only subtle facial movements related to opening the product, positioning the head, and applying mascara.

PRODUCT IDENTIFICATION — FIXED

Treat the attached product specifically as mascara.

Do not reinterpret it as:

- eyeliner
- eyebrow gel
- lash serum
- liquid lipstick
- eye pencil
- or another cosmetic product

The video must show real mascara behavior only.

REFERENCE PRIORITY

Priority 1: preserve the exact mascara from image 2.

Priority 2: preserve the exact influencer identity from image 1.

Priority 3: preserve the exact approved first-frame environment.

Priority 4: show the mascara opening naturally.

Priority 5: show realistic root-to-tip mascara application.

Priority 6: maintain natural eye anatomy, eyelash behavior, hand realism, and cosmetic physics.

If any conflict occurs, simplify the camera movement rather than changing the product, influencer, or environment.

ABSOLUTE MASCARA PRODUCT LOCK

Preserve the attached mascara exactly throughout every frame:

- same brand

- same product model
- same tube
- same packaging shape
- same dimensions
- same proportions
- same cap
- same wand
- same wand stem
- same brush head
- same bristle arrangement
- same brush length
- same brush thickness
- same applicator shape
- same logo
- same label
- same lettering
- same spelling
- same typography
- same printed graphics
- same product colors
- same material
- same finish
- same gloss level
- same black or colored mascara pigment
- and every visible construction detail

Do not redesign, replace, simplify, recolor, mirror, duplicate, enlarge, shrink, or morph the product.

Do not substitute a generic mascara tube.

Do not create a different brush head.

Do not change a straight wand into a curved wand.

Do not change bristle density.

Do not invent another applicator.

Do not change the product between shots.

ORIGINAL PRODUCT RESET RULE

At the beginning of every new shot, reconstruct the mascara directly from image 2.

Do not use the generated mascara from the previous shot as the reference for the next shot.

Every shot must independently match the original attached mascara.

No packaging drift.

No logo drift.

No wand drift.

No brush-head drift.

No color drift.

EXACT MASCARA COLOR AND FINISH LOCK

The pigment visible:

- on the wand
- on the brush bristles
- during application
- on the eyelash roots
- along the eyelash lengths
- and on the finished lashes

must match the exact mascara color shown or clearly supported by image 2.

Preserve the same:

- hue
- depth

- darkness
- opacity
- finish
- shine level
- and overall pigment identity

For black mascara, create a deep, rich, natural black.

Do not create gray, blue-black, brown, purple, or another color unless the attached mascara clearly shows that color.

The final lashes must display the exact product tone.

No color fading.

No pigment disappearance.

No shade drift between shots.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly throughout every shot:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eyes
- same eye shape
- same eye color
- same eyebrows
- same nose
- same lips
- same jawline
- same cheek structure
- same hairstyle
- same hair color
- same hair texture
- same hairline

- same hand appearance
- and same recognizable identity

Do not replace the influencer with another woman during the B-roll.

Do not alter the eye shape.

Do not enlarge the eyes.

Do not change the eyelashes before application.

Do not change the eyebrows.

No face drift.

No eye drift.

No hand identity drift.

No beauty-filter transformation.

PRE-APPLICATION EYELASH STATE

Before the mascara application begins, keep the eyelashes natural and lightly defined.

Do not begin with fully coated lashes.

Do not create false eyelashes.

Do not create oversized lash volume before physical application.

The viewer must clearly perceive the gradual difference between:

- untreated eyelashes
- and mascara-coated eyelashes

Preserve the influencer’s real eyelash direction, density, length, and natural anatomy.

EXACTLY FOUR-SHOT STRUCTURE

SHOT 1 — 0.0s TO 1.4s — SILENT BEAUTY PREPARATION

Start from the approved first-frame composition.

Use the same cinematic close beauty framing from approximately the shoulders upward.

The influencer holds the exact mascara naturally near her face.

She remains silent and focused.

She briefly looks at the mascara and prepares to open it.

Both her face and the complete product remain sharply visible.

Preserve the exact original environment, lighting, hairstyle, outfit, and camera angle.

This is not a B-roll shot.

No talking.

No promotional gestures.

SHOT 2 — 1.4s TO 3.4s — B-ROLL 1: OPENING THE EXACT MASCARA

Cut to the first dedicated B-roll scene.

Focus closely on the influencer's real hands opening the EXACT attached mascara.

Show:

- one hand holding the tube securely
- the other hand gripping the cap naturally
- realistic finger pressure

- the cap unscrewing in the correct direction
- subtle thread resistance
- the wand being pulled slowly from the tube
- the brush passing naturally through the wiper opening
- a controlled amount of mascara remaining on the brush
- the exact brush shape
- the exact bristle arrangement
- and the exact product pigment

The opening must feel:

- slow
- human
- delicate
- controlled
- physically correct
- and visually satisfying

The product and wand are the complete visual focus.

Do not make the cap open by itself.

Do not make the wand appear from nowhere.

Do not make the cap disappear.

Do not generate excessive clumps on the brush.

Do not create dripping mascara.

Do not pump the wand repeatedly inside the tube.

Do not switch to another mascara.

SHOT 3 — 3.4s TO 6.8s — B-ROLL 2: PRECISE ROOT-TO-TIP MASCARA APPLICATION

Cut to the second dedicated B-roll scene.

Use an extreme cinematic close-up focused on one eye and its upper eyelashes.

The influencer slightly stabilizes her head backward and gently raises her chin.

This positioning exposes the eyelash roots and keeps the wand away from the eyelid skin.

Her eye remains naturally open or softly lowered according to the physically correct application angle.

The exact mascara wand enters the frame slowly.

The brush is placed precisely at the base of the upper eyelashes.

The bristles must visibly engage with the lash roots.

She performs one controlled micro zig-zag movement from left to right while simultaneously drawing the wand upward from the roots toward the tips.

The zig-zag must be:

- very small
- restrained
- controlled
- stable
- and physically realistic

The purpose of the movement is to deposit product at the roots and separate the lashes while combing them upward.

The motion remains continuous.

As the wand approaches the lash tips, the movement slows slightly.

At the tips, she performs one soft upward pull, creating a subtle natural curl and lengthening effect.

The hand remains extremely stable.

No trembling.

No sudden wrist movement.

No exaggerated brushing.

No repeated aggressive passes.

The mascara must be applied only:

- from the lash roots
- along the real lash strands
- to the lash tips

The viewer must clearly see the pigment transferring from the brush to the eyelashes.

The result must develop gradually exactly where the brush passes.

The finished lashes must appear:

- visibly longer
- ultra-defined
- individually separated
- darker
- clean
- lifted
- naturally curved
- and coated from root to tip

The black contrast must become noticeable immediately but remain realistic.

No clumps.

No spider lashes.

No stuck-together lash groups.

No mascara on the eyelid.

No mascara below the eye.

No mascara on the skin.

No brush touching the eyeball.

No product inside the eye.

No artificial false-lash effect.

SHOT 4 — 6.8s TO 8.0s — SILENT FINISHED EYE RESULT

Return to the exact original close beauty composition from Shot 1.

Preserve the same:

- camera angle
- camera height
- room
- background
- lighting
- outfit
- hairstyle
- and facial identity

The influencer remains completely silent.

She lowers the wand slightly and calmly looks toward the camera or nearby mirror.

The exact mascara remains visible in her hand.

The treated eye must show:

- deep pigment
- noticeably longer lashes

- clean separation
- subtle upward curvature
- strong definition
- no clumping
- no smudging
- and preserved natural eyelash anatomy

The untreated eye may remain slightly more natural when composition allows, creating a subtle visible contrast between mascara and no mascara.

Do not exaggerate the difference.

Do not create asymmetrical facial distortion.

This is not a B-roll shot.

No speech.

No lip movement forming words.

No promotional gesture.

MASCARA APPLICATION TECHNIQUE — CRITICAL

The application must follow physically correct professional mascara technique:

1. slightly raise the chin;
2. position the brush at the lash roots;
3. perform restrained micro zig-zag movements;
4. move continuously from roots to tips;
5. slow down near the tips;
6. finish with a soft upward pull;
7. separate the lashes while depositing pigment;
8. avoid direct contact with eyelid skin;
9. preserve natural lash direction;
10. stop before excessive product accumulation.

Do not brush only the tips.

Do not begin in the middle of the lashes.

Do not apply mascara backward.

Do not sweep horizontally across the eyelid.

Do not use broad dramatic movements.

HUMAN OPENING PHYSICS

Show:

- correct cap rotation
- realistic thread resistance
- subtle hand pressure
- natural wrist alignment
- controlled wand extraction
- realistic movement through the tube wiper
- believable product viscosity
- accurate contact shadows
- and physically coherent product weight

No floating cap.

No disappearing tube.

No self-opening mascara.

No wand clipping through the tube.

No cap clipping through fingers.

EYELASH AND MASCARA PHYSICS

Show:

- real bristle-to-lash contact
- subtle eyelash flexibility

- natural lash separation
- gradual pigment buildup
- realistic product viscosity
- authentic root coating
- controlled product transfer
- subtle lash lift
- real lash-tip movement
- and physically accurate brush resistance

Each lash must remain attached to the natural lash line.

No floating lashes.

No instantly generated long lashes.

No lash multiplication.

No lashes growing before brush contact.

No digital transformation.

EYE SAFETY AND ANATOMY

Maintain physically accurate eye anatomy.

Show:

- natural eyelid shape
- realistic eye moisture
- real eyelashes emerging from the lash line
- correct distance between brush and eyeball
- subtle natural blinking only when physically safe
- stable pupil and iris
- realistic eye reflections

The mascara wand must never:

- touch the eyeball
- enter the eye

- pass through the eyelid
- bend through the lashes unnaturally
- or cause visible irritation

No red eye.

No watery-eye exaggeration.

No eye deformation.

HAND REALISM

Maintain:

- exactly five fingers per visible hand
- correct thumb placement
- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible skin pores
- fine skin lines
- correct wrist alignment
- physically believable grip
- stable precision
- accurate contact shadows

No extra fingers.

No fused fingers.

No missing fingers.

No hand morphing.

No impossible grip.

No trembling hand.

SKIN AND FACE REALISM

Show:

- visible skin pores
- natural facial microtexture
- fine lines
- realistic eyelid texture
- natural under-eye texture
- subtle tonal variation
- individual eyebrow hairs
- real eyelash strands
- individual hair strands
- natural eye moisture
- subtle natural facial asymmetry

No waxy skin.

No plastic face.

No artificial smoothing.

No glass-skin effect.

No beauty-filter transformation.

CAMERA

Shot 1

- cinematic close beauty framing
- 70mm to 85mm equivalent lens
- face and mascara equally sharp
- natural eye-level angle
- exact approved first-frame composition

B-roll Shot 2

- product-focused close-up

- 85mm to 100mm equivalent lens
- tube, cap, wand, fingers, and brush sharply visible
- product opening is the visual focus

B-roll Shot 3

- extreme eye and eyelash close-up
- 90mm to 105mm macro-lens aesthetic
- one eye and upper lashes occupying most of the frame
- wand, roots, lash lengths, tips, and pigment transfer completely sharp

Shot 4

- return to the exact original 70mm to 85mm beauty framing
- same camera position
- same angle
- same environment continuity

No aggressive zoom.

No orbit.

No fisheye.

No artificial camera shake.

FOCUS

Shot 2 must focus completely on the mascara packaging, cap, wand, and opening mechanism.

Shot 3 must focus completely on:

- the brush touching the lash roots
- the micro zig-zag movement
- the pigment transfer
- the separated lashes
- and the upward root-to-tip application

Do not shift focus to the background.

No blurred mascara tube.

No blurred brush head.

No blurred eyelashes.

No blurred contact point.

No focus pulsing.

No excessive bokeh hiding errors.

LIGHTING

Use the exact lighting established in the approved first frame.

Maintain:

- natural skin tones
- exact mascara packaging color
- exact mascara pigment
- realistic eye reflections
- balanced exposure
- neutral white balance
- soft frontal illumination
- subtle lateral shaping
- natural shadows

Do not alter the room lighting between shots.

No colored lighting.

No fake HDR.

No artificial glow.

No dramatic color grading.

AUDIO

No speech.

No narration.

No voice-over.

No music.

Use only subtle synchronized ASMR sounds:

- cap unscrewing
- wand passing through the tube opening
- soft applicator handling
- very subtle brush movement
- quiet room tone
- faint clothing movement

No audible speaking.

No whispers.

No intelligible background voices.

CLEAN FRAME

Outside legitimate branding physically printed on the exact mascara, generate no:

- subtitles
- captions
- promotional text
- prices
- floating labels
- social-media interface
- icons
- banners

- unrelated logos
- watermarks

NEGATIVE PROMPT

speaking, dialogue, narration, voice-over, lip-sync, singing, whispering, more than two B-roll scenes, missing opening B-roll, missing application B-roll, altered initial environment, changed room, changed background, changed furniture, changed lighting, changed outfit, changed hairstyle, wrong cosmetic category, eyeliner application, eyebrow-gel application, changed mascara, similar replacement mascara, generic mascara packaging, altered tube, changed cap, changed wand, changed brush shape, changed bristles, changed logo, changed pigment, product drift, packaging morphing, mascara opening itself, floating cap, disappearing wand, invented applicator, dripping mascara, excessive product on wand, clumped brush, wrong application direction, brush touching eyeball, brush touching eyelid skin, mascara on skin, mascara on eyelid, mascara under eye, mascara inside eye, shaky hand, robotic movement, wide zig-zag movement, aggressive brushing, spider lashes, clumped lashes, stuck-together lashes, false eyelashes appearing, excessive lash volume, eyelashes growing before contact, floating eyelashes, different model in B-roll, facial identity drift, changed eye shape, enlarged eyes, changed skin tone, hand morphing, extra fingers, missing fingers, fused fingers, wand clipping through hand, waxy skin, plastic face, artificial beauty filter, blurred opening, blurred wand, blurred eyelashes, focus pulsing, excessive bokeh, CGI, 3D render, illustration, collage, AI artifacts, subtitles, text overlays, watermark

FINAL OUTPUT

One ultra-photorealistic cinematic 8-second vertical mascara video showing the EXACT influencer silently using the EXACT attached mascara inside the exact same environment established in the approved first frame.

The video must contain exactly two dedicated B-roll scenes:

1. a product-focused B-roll showing the exact mascara being opened naturally, with the cap unscrewing and the exact wand being removed from the tube;

2. an application-focused B-roll showing the exact mascara brush placed at the upper-lash roots, moving with a restrained micro zig-zag motion from side to side while traveling continuously toward the tips, slowing near the ends, and finishing with a delicate upward pull.

The influencer never speaks, narrates, lip-syncs, or performs a verbal product presentation.

Preserve the exact initial environment, absolute mascara identity, exact wand geometry, deep pigment, absolute influencer identity, real eye anatomy, stable hand control, visible root-to-tip product transfer, individually separated elongated lashes, natural skin microtexture, cinematic human realism, and absolutely no visible AI traits.

—----------

Ugc batom
UNIVERSAL CINEMATIC MAKEUP APPLICATION VIDEO — AUTOMATIC PRODUCT IDENTIFICATION / HUMAN PRODUCT OPENING / PRODUCT-SPECIFIC B-ROLL APPLICATION / EXACT INFLUENCER AND PRODUCT LOCK

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the attached makeup product.

Use the approved generated image as the immutable first-frame anchor.

Create one ultra-photorealistic cinematic vertical 9:16 beauty UGC video showing the EXACT influencer presenting, opening, using, and applying the EXACT attached makeup product according to its real cosmetic category, packaging mechanism, applicator, texture, shade, finish, and intended facial application area.

The system must automatically identify what the attached product is before generating any action.

The video must include:

- one initial beauty hero scene;
- one dedicated B-roll scene showing the product being opened naturally;
- one dedicated application B-roll scene focused on the exact facial area where the product is used;
- and one final beauty scene showing the completed result.

The influencer remains silent throughout the entire video.

FORMAT

- cinematic vertical 9:16
- 8 seconds
- 24 fps
- exactly four connected scenes
- three clean editorial cuts
- professional 4K beauty-commercial realism
- no dialogue
- no narration
- no voice-over
- no subtitles
- no text overlays

REFERENCE PRIORITY

Priority 1: preserve the exact makeup product from image 2.

Priority 2: preserve the exact influencer identity from image 1.

Priority 3: reproduce the product's real opening and application method.

Priority 4: preserve realistic human anatomy, cosmetic physics, and skin response.

Priority 5: environment and visual styling.

If any conflict occurs, simplify the scene rather than changing the product or influencer.

AUTOMATIC PRODUCT ANALYSIS — CRITICAL

Before generating the video, visually analyze image 2 and determine:

- the exact makeup category;
- the exact packaging type;
- whether the product is open or closed;
- the real cap, lid, pump, compact, twist, click, snap, zipper, or wand mechanism;
- whether the product includes a visible applicator;
- the intended facial application area;
- the correct cosmetic application technique;
- the visible cosmetic shade;
- the texture;
- the opacity;
- the finish;
- and the physically plausible final result.

Possible product categories include:

- lipstick
- liquid lipstick
- lip gloss
- lip oil
- lip tint
- lip balm
- lip liner
- mascara
- eyeliner
- eye pencil
- eyeshadow
- eyeshadow palette
- eyebrow pencil
- eyebrow gel
- brow pomade
- foundation
- skin tint
- concealer
- primer

- setting spray
- compact powder
- loose powder
- blush
- bronzer
- contour
- highlighter
- illuminator
- makeup stick
- cream makeup
- pressed makeup
- or another real cosmetic makeup product

Do not transform the attached product into another category.

Do not use a generic makeup action.

The opening method and application technique must correspond specifically to the product visible in image 2.

AUTOMATIC APPLICATION LOGIC

Apply the following category-specific behavior only after identifying the exact product.

LIPSTICK, LIP GLOSS, LIP OIL, LIP TINT, LIP BALM OR LIP LINER

Apply only to the lips.

Use the exact lipstick bullet, wand, applicator, pencil tip, or balm mechanism visible or physically supported by the reference.

Follow the natural lip contour.

Apply from the center outward with precise controlled movement.

Do not cross the natural lip line.

The final lip shade and finish must exactly match the visible product.

MASCARA

Apply only to the eyelashes.

Open the tube by naturally unscrewing and removing the exact wand.

Move the applicator from the lash roots toward the tips using restrained upward strokes.

Do not touch the eyeball or eyelid skin.

Do not create false eyelashes.

Preserve the exact black, brown, colored, volumizing, lengthening, or natural finish visually supported by the product.

EYELINER OR EYE PENCIL

Apply only along the upper or lower lash line according to the real product type.

Use a controlled, anatomically correct movement.

Keep the eye naturally open, softly lowered, or gently closed according to the application angle.

Do not draw exaggerated wings unless visually appropriate to the product.

EYESHADOW OR EYESHADOW PALETTE

Apply only to the eyelid or eye crease.

Use the visible included applicator when clearly shown.

When no included applicator is visible, use one separate clean, neutral, unbranded professional eyeshadow brush.

Do not imply that the separate brush is included with the product.

Preserve the exact selected shade, undertone, shimmer, opacity, and finish.

EYEBROW PENCIL, GEL OR POMADE

Apply only to the eyebrows.

Follow the influencer's natural eyebrow direction and shape.

Use light controlled strokes or natural brushing motion according to the real product mechanism.

Do not redesign, enlarge, or overdefine the eyebrows.

FOUNDATION OR SKIN TINT

Apply to appropriate facial areas using small controlled amounts.

Use the visible pump, dropper, stick, tube, bottle, or applicator mechanism.

Blend naturally across the skin without creating an artificial mask.

Preserve real skin texture.

The final coverage must match the apparent product type.

CONCEALER

Apply only to targeted areas such as:

- under the eyes;
- around the nose;
- or small visible facial areas.

Use the exact wand, stick, tube, or applicator mechanism.

Do not cover the entire face as foundation.

PRIMER

Apply a thin realistic layer to appropriate facial areas.

Use fingertips or the visible product mechanism.

Do not create a visible colored layer unless the product reference supports it.

COMPACT POWDER OR LOOSE POWDER

Open the compact or container naturally.

Apply with the visible included puff or applicator when clearly provided.

When no included applicator is visible, use one separate neutral unbranded powder brush or puff.

Apply gently to the forehead, nose, cheeks, or chin according to real cosmetic technique.

Do not create excessive airborne powder.

BLUSH

Apply mainly to the cheeks or upper cheek area.

Use a real brush, stick, cream applicator, sponge, or fingertips according to the identified product type.

Blend with soft upward and outward movement.

Preserve the exact visible blush hue and intensity.

BRONZER

Apply naturally to the perimeter of the face, cheek area, temples, or jawline according to the product format.

Use restrained blending.

Do not make the skin unnaturally orange.

CONTOUR

Apply only to anatomically appropriate contour areas such as:

- beneath the cheekbones;
- sides of the forehead;
- jawline;
- or sides of the nose when physically appropriate.

Keep the result subtle and realistic.

Do not alter the influencer's facial identity.

HIGHLIGHTER OR ILLUMINATOR

Apply to elevated facial areas such as:

- upper cheekbones;
- brow bone;
- bridge or tip of the nose;
- or cupid's bow.

Preserve the exact shine, shimmer, undertone, and reflective quality.

Do not generate metallic plastic skin.

SETTING SPRAY

Hold the exact bottle at a realistic distance from the face.

Close the eyes naturally.

Press the actual nozzle.

Generate a subtle physically realistic mist.

Do not create excessive water, smoke, fog, or a soaking-wet face.

OTHER MAKEUP PRODUCTS

Identify the real purpose, opening mechanism, applicator, intended facial area, and correct professional application method from image 2.

Do not invent an unsupported use.

ABSOLUTE PRODUCT LOCK — HIGHEST PRIORITY

Preserve the exact attached product throughout every frame:

- same brand
- same category
- same model
- same packaging
- same dimensions
- same proportions
- same container geometry
- same tube, bottle, compact, palette, stick, pencil, jar, or container
- same cap
- same lid
- same closure
- same pump
- same nozzle
- same wand
- same applicator
- same brush when included
- same lipstick bullet
- same pencil tip
- same powder pan
- same palette layout
- same number of shades
- same shade positions
- same transparent and opaque areas
- same colors
- same color distribution
- same label
- same logo

- same lettering
- same spelling
- same typography
- same printed graphics
- same materials
- same finish
- same gloss level
- and every visible construction detail

Do not redesign the product.

Do not replace it with a similar cosmetic.

Do not use another product from the same brand.

Do not simplify the packaging.

Do not recolor it.

Do not mirror it.

Do not reverse the label.

Do not rewrite or correct printed text.

Do not invent hidden packaging details.

Do not create a different cap, wand, applicator, brush, mirror, pump, nozzle, palette, or product mechanism.

Do not add or remove shades.

Do not duplicate the product.

ORIGINAL-REFERENCE RESET RULE

At the beginning of every new shot, reconstruct the product directly from image 2.

Do not use the product generated in the previous shot as the source for the next shot.

Every shot must independently match the original attached product reference.

This rule applies to:

- packaging geometry;
- label;
- logo;
- dimensions;
- cap;
- applicator;
- cosmetic color;
- finish;
- and all visible details.

No product drift between scenes.

EXACT SHADE AND FINISH LOCK — CRITICAL

The cosmetic color visible:

- inside the product;
- on the applicator;
- on the brush;
- on the lipstick bullet;
- on the fingertips;
- during application;
- and on the influencer's face after application

must remain visually consistent with the exact shade shown in image 2.

Preserve the same:

- hue
- undertone
- saturation

- brightness
- depth
- transparency
- opacity
- shimmer level
- shine level
- metallic effect
- matte effect
- satin effect
- creamy effect
- and visual color identity

Do not warm, cool, darken, lighten, desaturate, oversaturate, or reinterpret the cosmetic color.

Do not modify the shade to flatter the influencer.

Do not harmonize the shade with the background or clothing.

For transparent or translucent products, preserve the real transparency and finish instead of generating an opaque color.

For mascara and eyeliner, preserve the exact black, brown, colored, glossy, matte, or subtle finish shown or strongly supported by the product.

For foundation, concealer, or complexion products, preserve the exact product tone while blending it realistically into the influencer's natural skin.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly throughout every scene:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eye shape
- same eye color
- same eyebrows

- same nose
- same lips
- same natural lip volume
- same jawline
- same cheek structure
- same hairstyle
- same hair color
- same hair texture
- same hairline
- same recognizable appearance

Do not replace the influencer with a similar woman.

Do not beautify, rejuvenate, age, slim, reshape, stylize, or reinterpret her face.

Do not enlarge her lips or eyes.

Do not alter her nose, jawline, cheeks, eyebrows, or forehead.

No identity drift.

No face morphing.

No hairstyle change.

No artificial beauty filter.

MANDATORY FOUR-SCENE STRUCTURE

SHOT 1 — 0.0s TO 1.5s — BEAUTY HERO WITH EXACT PRODUCT

Start from the approved first-frame image.

Use a cinematic close beauty shot from approximately the shoulders upward.

The influencer holds the exact attached makeup product beside her face and close to the camera.

Both the face and product remain sharply readable.

She looks toward the camera with a calm, confident, elegant expression.

She is not applying the product yet.

SHOT 2 — 1.5s TO 3.2s — HUMAN PRODUCT OPENING B-ROLL

Cut to a precise product-focused beauty B-roll close-up.

Show the influencer opening the exact product according to its real mechanism.

Possible actions include only when physically supported:

- removing a cap;
- unscrewing a cap;
- twisting up a lipstick;
- pulling out a wand;
- opening a compact;
- lifting a palette lid;
- uncapping a pencil;
- pressing a pump;
- removing a protective cover;
- or activating another real visible mechanism.

The opening must feel:

- natural;
- deliberate;
- gentle;
- physically correct;
- and human.

Keep the product, fingers, logo, label, opening mechanism, and visible cosmetic material sharply readable.

Do not invent an unsupported mechanism.

Do not force the package open incorrectly.

Do not make the product open by itself.

SHOT 3 — 3.2s TO 6.4s — PRODUCT-SPECIFIC APPLICATION B-ROLL

Cut to a cinematic close-up or macro B-roll shot focused on the exact facial area where the identified product must be applied.

Examples:

- lips for lip products;
- eyelashes for mascara;
- lash line for eyeliner;
- eyelids for eyeshadow;
- eyebrows for brow products;
- cheeks for blush;
- cheekbones for highlighter;
- facial perimeter for bronzer;
- targeted facial zones for contour;
- skin for foundation, concealer, powder, or primer;
- full face at a safe distance for setting spray.

The product must be visibly and physically connected to the application.

Show the exact:

- applicator;
- brush;
- wand;
- pencil;
- stick;
- puff;
- sponge;
- fingertips;
- or spray mechanism

required by the identified product.

Use slow, controlled, precise, professional cosmetic movement.

The application must feel elegant, satisfying, and visually clear.

The camera must visibly show the influencer herself using the exact product.

Do not replace her hand with another person's hand.

Do not show an unidentified model.

Do not switch facial identity during the application close-up.

SHOT 4 — 6.4s TO 8.0s — FINAL BEAUTY RESULT

Return to the original close beauty composition.

Restore the same:

- camera angle;
- influencer identity;
- hairstyle;
- lighting;
- environment;
- outfit;
- and product packaging.

The influencer holds the exact product close to her face while calmly presenting the finished result.

The applied cosmetic must remain visible and consistent with the exact shade, texture, coverage, and finish of image 2.

Do not create an exaggerated transformation.

Do not alter her facial structure.

HUMAN PRODUCT OPENING PHYSICS

The product must obey real physical mechanics.

Show:

- realistic cap resistance;
- correct twisting direction;
- natural lid movement;
- realistic hinge movement;
- correct wand extraction;
- subtle product viscosity;
- believable pump pressure;
- real finger pressure;
- accurate contact shadows;
- and physically coherent hand movement.

No self-opening product.

No floating cap.

No disappearing lid.

No applicator appearing from nowhere.

No lid clipping through fingers.

No product changing shape while opening.

APPLICATION PHYSICS

The cosmetic must show physically accurate behavior according to its category.

Show:

- realistic viscosity;
- real pigmentation;
- gradual product transfer;
- natural blending;
- correct powder dispersion;
- subtle skin compression;
- believable brush contact;

- realistic applicator pressure;
- controlled product buildup;
- and authentic final texture.

Do not make the final result appear instantly without visible application.

Do not generate excessive product.

Do not cover the whole face unless the product's real use requires it.

Do not create floating powder, dripping cream, excessive mist, sticky strings, or impossible product movement.

HAND REALISM

Maintain anatomically correct hands throughout every scene.

Each visible hand must have:

- exactly five fingers
- correct thumb placement
- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible pores
- fine skin lines
- correct wrist alignment
- realistic grip pressure
- accurate contact shadows

Preserve the same hand identity between scenes.

No extra fingers.

No fused fingers.

No missing fingers.

No hand morphing.

No applicator clipping through fingers.

No impossible grip.

SKIN AND FACE REALISM

Show extreme natural human detail:

- visible skin pores
- fine facial lines
- natural under-eye texture
- subtle tonal variation
- natural lip texture
- individual eyebrow hairs
- individual eyelashes
- individual hair strands
- natural eye moisture
- fine facial hair when visible
- subtle natural facial asymmetry
- realistic skin compression during application
- authentic cosmetic contact with skin

No waxy skin.

No plastic face.

No artificial glass-skin effect.

No excessive smoothing.

No digital beauty-filter transformation.

No synthetic facial texture.

ENVIRONMENT

Use the same real, clean, premium-accessible Brazilian beauty environment established in the first frame.

Possible environment:

- organized residential vanity;
- clean bedroom dressing area;
- realistic bathroom beauty corner;
- or refined home makeup space.

Use restrained neutral colors and real residential materials.

The environment remains secondary and stable.

Do not add competing makeup products.

Do not add duplicate hero products.

Do not change the room between shots.

CAMERA

Shot 1

- cinematic close beauty shot
- 70mm to 85mm equivalent lens
- face and product equally sharp
- natural eye-level angle

Shot 2

- product-focused B-roll close-up
- 85mm to 100mm equivalent lens
- sharp hands, packaging, opening mechanism, and cosmetic material

Shot 3

- product-specific close-up or macro framing
- 85mm to 105mm macro-lens aesthetic

- exact application area occupying most of the frame
- product and facial contact point sharply visible

Shot 4

- return to the original 70mm to 85mm close beauty composition
- same camera height and angle as Shot 1

Use stable cinematic camera movement.

Only subtle human micro-movement.

No aggressive zoom.

No orbit.

No fisheye.

No extreme wide angle.

No artificial handheld shake.

FOCUS

Keep the intended hero elements sharply readable in every shot.

Shot 1:

- influencer's face;
- hand;
- complete product;
- label;
- and packaging edges.

Shot 2:

- opening mechanism;
- fingers;
- visible cosmetic material;

- applicator;
- logo;
- and packaging.

Shot 3:

- application area;
- applicator;
- cosmetic transfer;
- skin texture;
- and exact final shade.

Shot 4:

- influencer's face;
- applied result;
- and exact product.

No focus pulsing.

No blurred product.

No blurred application.

No excessive bokeh hiding errors.

No artificial portrait-mode cutout.

COLOR-MANAGED LIGHTING

Use soft neutral cinematic beauty lighting calibrated for accurate color reproduction.

Use:

- neutral white balance;
- high color-rendering illumination;
- soft frontal light;
- subtle lateral shaping;

- realistic skin tones;
- accurate packaging colors;
- accurate cosmetic shade;
- gentle natural reflections;
- balanced exposure.

No colored lighting.

No warm orange cast changing the product.

No pink, red, blue, green, or purple light contaminating the cosmetic shade.

No fake HDR.

No artificial glow.

No dramatic color grade.

AUDIO

No speech.

No narration.

No voice-over.

No music.

Use only subtle synchronized ASMR sounds:

- cap removal;
- compact opening;
- wand extraction;
- pump pressure;
- brush movement;
- applicator contact;
- soft product handling;
- quiet room tone;
- and subtle clothing movement.

The sounds must match the visible action exactly.

No audible action without visible physical cause.

CLEAN FRAME

Outside legitimate branding physically present on the exact product, generate no:

- subtitles
- captions
- promotional text
- prices
- floating labels
- social-media interface
- icons
- banners
- unrelated logos
- watermarks

NEGATIVE PROMPT

wrong makeup category, generic makeup action, wrong application area, incorrect product use, product applied to wrong facial zone, changed product, similar replacement product, generic cosmetic packaging, changed container, altered cap, changed lid, changed pump, changed nozzle, changed wand, changed applicator, changed brush, changed lipstick bullet, changed palette layout, extra palette shades, missing shades, altered logo, mirrored label, misspelled branding, distorted typography, changed product shade, color mismatch between product and face, incorrect undertone, incorrect finish, warmer color, cooler color, darker color, lighter color, oversaturated color, desaturated color, product drift, packaging morphing, product opening itself, floating lid, disappearing cap, invented applicator, hidden component appearing from nowhere, wrong opening mechanism, product clipping through hand, duplicate product, changed influencer, different model during B-roll, facial identity drift, changed hairstyle, changed skin tone, changed facial structure, enlarged lips, enlarged eyes, hand morphing, extra fingers, missing fingers, fused fingers, deformed hands, product applied outside

intended area, excessive cosmetic amount, floating powder, dripping makeup, excessive spray, product on teeth, applicator entering eye, brush clipping through face, robotic movement, fake skin, waxy face, plastic skin, excessive smoothing, artificial beauty filter, blurred product, blurred application area, focus pulsing, excessive bokeh, CGI, 3D render, illustration, collage, AI artifacts, dialogue, narration, subtitles, text overlays, watermark.

FINAL OUTPUT

One ultra-photorealistic cinematic 8-second vertical beauty UGC video showing the EXACT influencer presenting, naturally opening, and correctly applying the EXACT attached makeup product.

The system must automatically identify the product category, packaging mechanism, applicator, intended facial application area, cosmetic technique, shade, texture, and finish before generating the action.

The video begins with the influencer holding the product close to her face, cuts to a human product-opening B-roll, cuts to a detailed product-specific application B-roll showing the exact influencer using the product on the correct facial area, and returns to the original beauty composition with the finished result.

Preserve absolute product identity, exact packaging, exact color, exact shade-to-skin consistency, absolute influencer identity, realistic hands, physically accurate product handling, natural skin microtexture, cinematic beauty realism, and absolutely no visible AI traits.

—----------

Ugc maquiagem
UNIVERSAL CINEMATIC COMPACT POWDER VIDEO — EXACTLY TWO B-ROLL SCENES / COMPACT OPENING + POWDER BRUSH APPLICATION / SILENT BEAUTY ROUTINE / ABSOLUTE PRODUCT AND FACE LOCK

Use image 1 as the only and absolute identity reference for the influencer.

Use image 2 as the only and absolute visual reference for the compact powder product.

Use the approved generated image as the immutable first-frame anchor.

Create one ultra-photorealistic cinematic vertical 9:16 beauty video showing the EXACT influencer silently doing her makeup with the EXACT attached compact powder.

She never speaks.

She does not present the product verbally.

She does not lip-sync.

She simply holds the compact powder, opens it naturally, and applies it to her face with a real powder brush.

The video must contain exactly TWO dedicated B-roll scenes:

1. one B-roll scene focused on the compact powder packaging in her hand while she opens it naturally;
2. one B-roll scene focused on the powder brush applying the product to the face, close enough to clearly show the subtle visual difference between the area with powder and the area without powder.

FORMAT

- cinematic vertical 9:16
- 8 seconds
- 24 fps
- exactly four connected shots
- exactly two dedicated B-roll shots
- three clean editorial cuts
- professional 4K beauty-commercial realism
- no dialogue
- no narration
- no voice-over
- no lip-sync
- no singing
- no subtitles

- no text overlays
- no music

SILENT PERFORMANCE — CRITICAL

The influencer remains completely silent throughout the entire video.

Her lips do not form words.

She does not address the camera.

She does not explain the product.

Her expression is calm, focused, natural, and concentrated on doing her makeup.

Use only subtle natural facial movements related to opening and applying the powder.

PRODUCT IDENTIFICATION — FIXED

The attached product must be treated specifically as a compact powder.

Do not reinterpret it as blush, bronzer, highlighter, foundation, loose powder, eyeshadow, or another cosmetic category.

The video must show real compact-powder behavior only.

REFERENCE PRIORITY

Priority 1: preserve the exact compact powder from image 2.

Priority 2: preserve the exact influencer identity from image 1.

Priority 3: show the exact compact powder packaging opening naturally in her hand.

Priority 4: show the powder being applied with a real powder brush to the correct facial area.

Priority 5: preserve realistic skin texture and a subtle believable difference between powdered and unpowdered skin.

If any conflict occurs, simplify the background or camera movement instead of changing the product or influencer.

ABSOLUTE PRODUCT LOCK

Preserve the attached compact powder exactly throughout every frame:

- same brand
- same product type
- same compact format
- same packaging shape
- same dimensions
- same proportions
- same lid
- same hinge
- same base
- same compact thickness
- same edges
- same corners
- same label
- same logo
- same lettering
- same spelling
- same typography
- same graphics
- same materials
- same transparent or opaque areas
- same finish
- same visible powder pan
- same powder color
- same powder undertone
- same powder surface appearance
- and every visible packaging detail

Do not redesign, replace, simplify, recolor, mirror, duplicate, enlarge, shrink, or morph the product.

Do not convert it into another makeup product.

Do not invent extra compartments, mirrors, puffs, or accessories unless they are clearly visible and supported by the attached reference.

ORIGINAL PRODUCT RESET RULE

At the beginning of every new shot, reconstruct the product directly from image 2.

Do not use the generated compact from the previous shot as the reference for the next shot.

Every shot must independently match the original attached compact powder.

No packaging drift.

No logo drift.

No powder-color drift.

No hinge drift.

No shape drift.

EXACT POWDER SHADE AND FINISH LOCK — CRITICAL

The compact powder visible in the packaging and the powder effect visible on the skin must remain faithful to the attached product.

Preserve the same:

- hue
- undertone
- brightness
- depth

- finish
- opacity level
- softness
- and visual powder identity

The powder result on the skin must be subtle and realistic.

This is not a strong color cosmetic transformation.

The result must show a believable powder effect:

- slightly more even skin surface
- slightly reduced shine
- softly refined finish
- subtle smoothing of excess glow
- natural soft-matte or satin finish according to the product
- and realistic complexion refinement

Do not turn the compact powder into obvious blush, bronzer, or contour color on the face.

Do not create a heavy mask.

Do not create a white cast unless the attached product visibly supports that.

Do not create an airbrushed fake result.

The viewer must notice a subtle but visible difference between skin before powder and skin after powder.

ABSOLUTE INFLUENCER IDENTITY LOCK

Preserve exactly throughout every shot:

- same facial identity
- same face shape
- same skin tone
- same apparent age
- same eyes

- same eyebrows
- same nose
- same natural lips
- same jawline
- same cheek structure
- same hairstyle
- same hair color
- same hair texture
- same hairline
- same hand appearance
- and same recognizable identity

Do not replace the influencer with another woman during the B-roll.

Do not change her facial proportions.

Do not alter her skin tone.

Do not alter her hairstyle.

No face drift.

No hand identity drift.

No beauty-filter transformation.

EXACTLY FOUR-SHOT STRUCTURE

SHOT 1 — 0.0s TO 1.4s — SILENT BEAUTY PREPARATION

Start from the approved first-frame composition.

Use a cinematic close beauty shot from approximately the shoulders upward.

The influencer holds the exact compact powder naturally near her face.

She remains silent and focused.

She briefly looks at the compact and prepares to open it.

Both her face and the complete compact remain sharply visible.

This is not a B-roll shot.

No talking.

No promotional gestures.

SHOT 2 — 1.4s TO 3.4s — B-ROLL 1: COMPACT POWDER OPENING IN HER HAND

Cut to the first dedicated B-roll scene.

Focus closely on the influencer's real hand holding and opening the EXACT attached compact powder.

The shot must emphasize:

- the compact packaging in her hand
- the lid
- the hinge movement
- the fingers making real contact
- the compact opening naturally
- the visible powder pan
- and the real product appearance

The opening must feel slow, human, delicate, and physically believable.

The focus here is the packaging and opening action.

Do not invent a mechanism.

Do not make the compact open by itself.

Do not make the lid disappear.

Do not change the powder pan color or shape.

Do not switch to another compact.

SHOT 3 — 3.4s TO 6.8s — B-ROLL 2: POWDER BRUSH APPLICATION ON THE FACE

Cut to the second dedicated B-roll scene.

Use a closer beauty B-roll shot focused on the exact area where the compact powder is being applied with a real powder brush.

Use one real clean unbranded powder brush.

The brush must be physically believable, soft, proportional, and appropriate for face powder application.

Show the exact influencer herself applying the powder with the brush.

Do not switch to another model.

Do not show only anonymous skin.

Frame the face closely enough that the viewer can clearly notice the subtle visual difference between:

- the area that has already received powder
- and the nearby area that has not yet received powder

The powder brush must visibly touch the skin.

The powder must be applied to realistic facial areas such as:

- upper cheek
- cheek near the nose
- under-eye outer area when appropriate
- forehead
- chin
- or sides of the face

Use one or two natural facial zones only.

Do not brush the entire face aggressively.

The movement must be:

- soft
- slow
- controlled
- delicate
- circular or lightly sweeping
- professional
- and physically realistic

The product transfer must feel subtle but visible.

The applied area should show:

- slightly more refined texture
- slightly more matte or softly satin finish
- slightly reduced shine
- softly evened complexion
- real skin still visible
- pores and microtexture still present
- and a believable compact-powder finish

The unpowdered area must remain slightly more natural, slightly shinier, or less refined so that the viewer can clearly perceive the before-and-after contrast in a subtle realistic way.

Do not create an exaggerated transformation.

Do not erase pores completely.

Do not create a plastic matte patch.

SHOT 4 — 6.8s TO 8.0s — SILENT FINISHED RESULT

Return to the original close beauty composition from Shot 1.

The influencer remains completely silent.

She calmly lowers the brush or compact slightly and presents the finished result naturally.

The exact compact powder remains visible in her hand.

The skin finish must now show the subtle refined effect of the powder.

This is not a B-roll shot.

No speech.

No lip movement forming words.

No promotional gesture.

HUMAN OPENING PHYSICS

Show:

- real finger pressure
- natural wrist movement
- realistic lid resistance
- believable hinge motion
- accurate contact shadows
- physically coherent compact weight
- and natural product handling

No floating lid.

No disappearing compact parts.

No compact clipping through fingers.

No self-opening packaging.

POWDER APPLICATION PHYSICS

Show:

- real brush-to-skin contact
- soft bristle compression against the face
- subtle powder pickup behavior
- believable transfer to the skin
- realistic sweeping or circular brush movement
- gradual finish change
- and natural skin response

Do not show excessive airborne powder clouds.

Do not show loose powder explosion.

Do not create an instant digital transformation.

Do not hide the brush outside the frame while the complexion changes.

The visual improvement must happen where the brush actually passes.

HAND REALISM

Maintain:

- exactly five fingers per visible hand
- correct thumb placement
- natural finger lengths
- real joints
- realistic knuckles
- natural nails
- visible skin pores
- fine skin lines
- correct wrist alignment
- physically believable grip
- accurate contact shadows

No extra fingers.

No fused fingers.

No missing fingers.

No hand morphing.

No impossible grip.

SKIN AND FACE REALISM

Show:

- visible skin pores
- natural facial microtexture
- fine lines
- subtle tonal variation
- realistic under-eye texture
- individual eyebrow hairs
- individual eyelashes
- individual hair strands
- natural eye moisture
- authentic complexion response to powder
- subtle natural facial asymmetry

No waxy skin.

No plastic face.

No glass-skin effect.

No artificial smoothing.

No fake beauty-filter result.

The powder effect must enhance the skin realistically, not replace it.

CAMERA

Shot 1

- cinematic close beauty framing
- 70mm to 85mm equivalent lens
- face and product equally sharp
- natural eye-level angle

B-roll Shot 2

- product-focused close-up
- 85mm to 100mm equivalent lens
- compact, hand, hinge, and powder pan sharply visible
- packaging is the visual focus

B-roll Shot 3

- application-focused close-up
- 85mm to 105mm equivalent lens
- face area, brush, and powder effect clearly visible
- close enough to compare skin with powder and skin without powder
- brush-to-skin contact point sharply visible

Shot 4

- return to the same 70mm to 85mm beauty framing from Shot 1
- same camera height
- same angle
- same scene continuity

No aggressive zoom.

No orbit.

No fisheye.

No artificial camera shake.

FOCUS

Shot 2 must focus on the compact packaging and opening.

Shot 3 must focus on the powder brush touching the skin and the subtle complexion difference with and without powder.

Do not shift focus to background decor.

No blurred compact.

No blurred powder pan.

No blurred brush.

No blurred skin contact point.

No focus pulsing.

No excessive bokeh hiding errors.

LIGHTING

Use soft neutral cinematic beauty lighting calibrated for accurate color reproduction.

Maintain:

- natural skin tones
- exact product packaging color
- exact compact powder color
- realistic skin finish
- balanced exposure
- neutral white balance
- soft frontal illumination
- subtle lateral shaping
- natural shadows

No colored lighting.

No warm cast changing the powder color.

No fake HDR.

No artificial glow.

No dramatic color grading.

AUDIO

No speech.

No narration.

No voice-over.

No music.

Use only subtle synchronized ASMR sounds:

- compact opening
- lid movement
- soft hand handling
- gentle brush movement
- light bristle contact with the skin
- quiet room tone

No audible speaking.

No whispers.

No intelligible background voices.

CLEAN FRAME

Outside legitimate branding physically printed on the exact product, generate no:

- subtitles
- captions
- promotional text
- prices

- floating labels
- social-media interface
- icons
- banners
- unrelated logos
- watermarks

NEGATIVE PROMPT

speaking, dialogue, narration, voice-over, lip-sync, singing, whispering, more than two B-roll scenes, missing opening B-roll, missing powder-application B-roll, wrong product category, blush effect, bronzer effect, contour effect, heavy foundation effect, changed compact, similar replacement compact, altered packaging, changed lid, changed hinge, changed powder color, powder drift between shots, compact opening itself, floating lid, disappearing compact parts, wrong brush type, deformed brush, brush not touching skin, skin changing without brush contact, exaggerated transformation, plastic matte skin, airbrushed skin, erased pores, white cast not supported by product, different model in close-up, identity drift, changed face, changed hairstyle, changed skin tone, hand morphing, extra fingers, fused fingers, missing fingers, impossible grip, robotic movement, waxy skin, artificial beauty filter, blurred opening, blurred application, focus pulsing, excessive bokeh, CGI, 3D render, illustration, collage, AI artifacts, subtitles, text overlays, watermark.

FINAL OUTPUT

One ultra-photorealistic cinematic 8-second vertical makeup video showing the EXACT influencer silently using the EXACT attached compact powder.

The video must contain exactly two dedicated B-roll scenes:

1. a product-focused B-roll showing the compact powder packaging in her hand while she opens it naturally;
2. an application-focused B-roll showing a real powder brush applying the product to her face close enough to reveal the subtle, believable visual difference between skin with powder and skin without powder.

The influencer never speaks, never narrates, and never lip-syncs.

Preserve absolute product identity, exact compact packaging, exact powder tone, realistic brush application, absolute influencer identity, authentic skin microtexture, subtle true-to-life powder effect, and absolutely no visible AI traits.

—----------

Ugc bolsa
UNIVERSAL IMAGE PROMPT — FULL-BODY BAG UGC / INFLUENCER REFERENCE / AUTOMATIC SCENE AND LOOK / ABSOLUTE BAG AND FACE FIDELITY / EXTREME PHOTOREALISM

Use image 1 as the only and absolute visual reference for the bag.

Use image 2 as the only and absolute identity reference for the influencer.

Create one ultra-photorealistic vertical 9:16 full-body UGC commercial photograph showing the EXACT influencer naturally presenting and wearing the EXACT attached bag inside a real Brazilian environment automatically selected according to the bag category, style, target use, and visual language.

The final result must look like a real premium fashion or lifestyle photograph captured in a real location.

The influencer and bag must appear physically present in the same scene.

The bag must remain the hero product.

ABSOLUTE BAG LOCK:

Preserve exactly:

same category;
same quantity;
same model;

same shape;
same dimensions;
same proportions;
same silhouette;
same base;
same handles;
same straps;
same strap length;
same chains;
same hardware;
same zippers;
same pockets;
same seams;
same stitching;
same decorative elements;
same charms;
same logo;
same branding;
same letters;
same patterns;
same colors;
same materials;
same texture;
same finish;
and every visible construction detail.

Do not redesign, replace, recolor, simplify, mirror, duplicate, enlarge, shrink, or alter the bag.

Do not change strap length to fit the influencer.

Adjust the natural wearing position to the existing strap dimensions.

Do not invent accessories or remove included details.

ABSOLUTE INFLUENCER IDENTITY LOCK:

Preserve exactly:

same facial identity;
same face shape;
same skin tone;
same apparent age;
same eyes;
same eyebrows;
same nose;
same lips;
same jawline;
same hairstyle;
same hair color;
same hair texture;
same body type;
same height impression;
same body proportions;
and same recognizable appearance.

Do not replace the influencer with a similar person.

Do not beautify artificially.

Do not rejuvenate, age, slim, enlarge, stylize, or reinterpret the influencer.

AUTOMATIC BAG-WEARING METHOD:

Analyze the bag structure and use it naturally.

Examples:

top-handle bag: held naturally by one handle around thigh, hip, or waist height;

shoulder bag: worn on one shoulder at the natural strap length;

crossbody bag: worn diagonally across the torso with correct strap tension;

tote bag: carried by the handles or on the shoulder when structurally appropriate;

clutch: held naturally in one hand against the side or front of the body;

backpack: worn correctly on both shoulders or naturally held by its top handle;

travel bag: kept supported on the floor, bench, or luggage surface while the influencer holds one handle;

children's bag: shown only with an appropriate adult presenter when the commercial context calls for a parent presenting the product.

Do not use the bag incorrectly.

Do not force a crossbody position when the strap does not support it.

Do not make a heavy bag float.

AUTOMATIC ENVIRONMENT:

Select a real Brazilian location appropriate to the exact bag, such as:

a refined but accessible home entrance;
a bedroom dressing area;
a real living room;
a city apartment hallway;
a professional office;
a boutique;
a clothing store;
a café entrance;
a travel-preparation space;
a veranda;
or another coherent lifestyle environment.

The environment must harmonize with the bag without overpowering it.

AUTOMATIC LOOK:

Choose a complete outfit appropriate to:

the influencer's identity;
the bag category;
the bag colors;
the intended use;
the selected environment;
and the commercial positioning.

Use a real contemporary Brazilian look.

Possible styling includes:

casual chic;
business casual;
elegant everyday clothing;
travel look;
summer look;
neutral fashion styling;
jeans and blouse;
dress;
tailored trousers and top;
shirt and trousers;
or another coherent outfit.

Do not use visible unrelated logos.

Do not copy the bag print onto the clothing.

Do not use colors that make the bag disappear.

FULL-BODY COMPOSITION:

Show the influencer completely visible from head to feet.

Do not crop:

head;
hair;
hands;
bag;

legs;
shoes;
or feet.

Keep a small natural margin above the head and below the feet.

The influencer must not appear tiny in the environment.

The bag must remain large enough to clearly read its design, material, strap, and hardware.

Use a natural frontal or three-quarter fashion-lifestyle angle.

NATURAL UGC POSE:

Use one natural and commercially attractive pose.

The influencer may:

hold the bag by its handle;
wear it on the shoulder;
wear it crossbody;
rest one hand lightly near the bag;
take one subtle walking step;
or stand naturally while presenting it.

No exaggerated runway pose.

No rigid mannequin posture.

No hand covering the logo or main details.

HUMAN REALISM:

Show:

realistic body proportions;
natural posture;
correct weight distribution;

five fingers;
correct grip;
real skin pores;
fine facial texture;
individual hair strands;
natural nails;
real clothing fibers;
seams;
folds;
and physically accurate bag contact.

No beauty filter.

No waxy skin.

No plastic face.

No deformed hands.

No body clipping through the bag or strap.

CAMERA:

Professional full-frame camera realism.

Vertical 9:16.

4K commercial quality.

50mm equivalent lens for most scenes.

35mm to 50mm for larger travel bags.

Natural eye-level position.

DEEP FOCUS — NO ARTIFICIAL BLUR:

Keep the influencer and bag sharply detailed.

The environment must remain readable.

No portrait mode.

No strong bokeh.

No artificial background blur.

No cutout effect around hair, straps, hands, or bag edges.

LIGHTING:

Use physically believable light appropriate to the selected environment.

Preserve exact bag colors and natural skin tones.

Use real contact shadows where the bag touches the hand, shoulder, body, or floor.

CLEAN FRAME:

Outside legitimate branding printed on the bag, generate no captions, prices, promotional text, social-media interface, or watermarks.

NEGATIVE PROMPT:

wrong bag, similar replacement bag, changed straps, changed handle count, changed hardware, altered logo, wrong scale, duplicated bag, bag floating, incorrect wearing method, impossible strap tension, bag clipping through body, hand covering product, changed influencer face, identity drift, different hairstyle, changed skin tone, changed body type, waxy skin, plastic face, deformed hands, extra fingers, missing fingers, rigid pose, artificial fashion pose, fake environment, excessive blur, portrait cutout, CGI, 3D render, AI artifacts, random text, watermark.

FINAL OUTPUT:

One ultra-photorealistic vertical 9:16 full-body UGC fashion photograph of the EXACT attached influencer naturally wearing or presenting the EXACT

attached bag inside a real Brazilian environment automatically matched to the product, with an appropriate complete look, absolute bag fidelity, absolute face fidelity, correct scale, real human anatomy, deep focus, and no visible AI traits.

—----------

Transição aparecendo produto (neutro para qualquer produto)
VIDEO PROMPT — NATURAL CLOTHING SHOWCASE | SIDE PICKUP → DISPLAY → REMOVE FROM FRAME | 9:16 | 8 SECONDS | SINGLE CONTINUOUS TAKE | NO SPEECH

Use the reference image as the ONLY identity reference.

Use the second reference image as the ONLY reference for the clothing item she will hold.

Maintain exactly the same throughout the entire video:

- facial identity

- hairstyle

- body proportions

- outfit she is wearing

- accessories

- background

- lighting

- camera angle

- framing

- composition

Do not change or reinterpret any element.

The clothing item from Reference Image 2 must remain identical in:

- color

- shape

- fabric

- proportions

- texture

- wrinkles

- stitching

- sleeves

- collar

- print

- every visible detail

CAMERA

Vertical 9:16.

Static camera.

Natural handheld micro movement only.

No cuts.

No transitions.

No zoom.

No camera shake.

No focus hunting.

MOVEMENT

0.0–1.5s

The model looks naturally at the camera with a soft smile.

She reaches her right hand outside the frame and grabs the clothing item by one side, as if it were hanging just off-camera.

The movement is smooth and completely natural.

1.5–3.5s

She gently pulls the clothing item fully into the frame while holding it by one side.

The fabric reacts realistically with natural gravity, folds and movement.

3.5–5.8s

She presents the clothing item centered in front of her body.

She lightly swings it left and right two or three times with small, smooth movements so the fabric moves naturally.

She keeps smiling and looking toward the camera.

5.8–8.0s

She moves the clothing item toward the opposite side of the frame and removes it completely from view, as if placing it on a rack beside her.

After the clothing leaves the frame, she naturally returns her empty hand to her side while maintaining eye contact with the camera and a friendly smile.

REALISM

Ultra realistic human movement.

Natural arm mechanics.

Correct shoulder rotation.

Accurate elbow articulation.

Realistic wrist movement.

Natural finger grip on the clothing.

Physically correct fabric simulation.

Realistic inertia.

Natural gravity.

Authentic cloth folds.

No clipping.

No deformation.

No floating objects.

No object morphing.

No duplicated clothing.

No hand glitches.

No anatomy errors.

No AI artifacts.

EXPRESSION

Friendly smile.

Relaxed posture.

Confident presentation.

Natural blinking.

Subtle breathing.

Small realistic head micro-movements.

Organic facial micro-expressions throughout the video.

OUTPUT

Ultra-photorealistic.

8K realism.

Professional smartphone video quality.

Single continuous take.

No subtitles.

No text.

No logos.

No watermark.

No audio.

—--_

Rimel UGC
START OF ANIMATION (0.0–8.0s)

REFERENCE MODEL LOCK (HIGHEST PRIORITY)

Maintain the uploaded reference model with absolute 1:1 identity accuracy throughout the entire animation.

Preserve exactly the same face, facial proportions, eyes, eyebrows, nose, lips, jawline, skin tone, skin texture, hairstyle, hair color, makeup, body proportions, clothing, accessories, lighting, framing and background.

Do not generate another woman.

Do not modify facial anatomy.

Everything not explicitly animated remains identical to the reference image.

———————————————————————————————

CAMERA

Vertical 9:16.

Beauty close-up.

Natural handheld smartphone camera.

Very subtle handheld movement.

Extremely subtle native smartphone zoom only.

Single continuous shot.

No cuts.

No transitions.

No camera jumps.

POSE

The model remains almost completely still.

Only subtle breathing.

Minimal natural head movement.

One eye remains gently closed.

The opposite eye remains naturally open while looking directly toward the camera.

An open mascara bottle is gently held horizontally between her lips at the beginning.

The mascara wand is already positioned against the upper lashes of the closed eye.

EYELASH TRANSFORMATION LOCK (HIGHEST PRIORITY)

The closed eye is the treatment side.

The open eye is the untreated "before" side.

The untreated eye never changes.

Its eyelashes remain naturally short, lightly pigmented, with minimal curl and absolutely no mascara.

Only the treated eye gradually changes.

Each slow upward stroke deposits a realistic creamy black mascara layer.

The treated lashes gradually become:

- **slightly darker**
- **slightly longer**
- **naturally lifted**
- **moderately fuller**

Approximately 30–40% fuller than the untreated eye.

Keep every eyelash individually separated.

Maintain natural spacing.

No false lashes.

No extensions.

No spider lashes.

No excessive curl.

No excessive volume.

No clumping.

No smudging.

No product buildup.

TWO-HAND COORDINATION LOCK (HIGHEST PRIORITY)

The animation must always use BOTH HANDS naturally.

At the beginning:

• One hand holds ONLY the mascara wand.
• The other hand remains free.

The mascara bottle is gently held between the lips.

The wand immediately begins applying mascara.

The application never pauses.

After approximately 2 seconds:

The free hand gently removes the mascara bottle from the lips in one smooth, realistic movement.

Immediately after removing it, that SAME HAND naturally holds ONLY the mascara bottle for the remainder of the video.

The hand holding the wand NEVER stops applying mascara.

The wand never leaves the eyelashes during the bottle removal.

Both hands remain visible whenever naturally possible.

From that moment until the end:

• Right hand (or original wand hand) permanently holds ONLY the mascara wand.
• Left hand (or original bottle hand) permanently holds ONLY the mascara bottle.

The bottle is displayed naturally beside the face without covering it.

The wand hand continues making slow upward application strokes.

Both hands move independently with realistic human coordination.

Natural finger adjustments.

Natural wrist movement.

Natural grip pressure.

Realistic arm biomechanics.

OBJECT LOCK

The mascara wand never changes hands.

The mascara bottle never changes hands after leaving the lips.

No object swapping.

No hand switching.

No duplicated hands.

No disappearing hands.

No disappearing bottle.

No disappearing wand.

No floating objects.

No teleportation.

No impossible movements.

No AI artifacts.

APPLICATION

Using slow, delicate upward strokes from root to tip, she continuously applies mascara only to the upper lashes of the closed eye.

The wrist remains relaxed.

The fingers remain naturally curved.

The elbow stays outside the frame.

The wand never blocks the eye.

The bottle hand naturally presents the product near the face while keeping the branding visible.

The mascara application remains smooth, continuous and uninterrupted until the end.

ENDING

During the final second, the mascara application finishes naturally.

She slightly lowers the wand while still holding it.

The other hand continues elegantly presenting the mascara bottle beside her face.

She opens both eyes.

She gives a soft, confident smile while looking directly into the camera.

Hold the final beauty pose for a brief moment.

End on a clean premium cosmetic advertisement frame.

Ultra-realistic.

Natural skin.

Natural eyelashes.

Professional beauty commercial quality.

CTA gloss
AUDIO SETTINGS Generate VIDEO ONLY. No audio. No narration. No voice. No speech. No dialogue. No conversation. No lip sync. No jaw movement. No mouth articulation. No singing. No music. No background music. No ambient sound. No sound effects. No ASMR. Output must be completely silent.
FRAME 3 (16–24s)
The subject naturally completes the demonstration and settles into a relaxed finishing pose. Small breathing movements, realistic posture stabilization, subtle blinking and authentic human behavior continue throughout the scene.
She naturally presents the product for a brief moment, then gently lowers her free hand and points straight down below the frame with her index finger as if indicating the video link. She holds the pointing gesture naturally for the final second while maintaining a relaxed closed-mouth smile and keeping the product clearly visible.
Maintain perfect temporal consistency. The product, clothing, identity, lighting, reflections and environment remain visually identical to the reference image in every frame. PRODUCT LOCK The product is locked to the reference image. Preserve identical shape, proportions, size, color, graphics, labels, logos, texture, materials, reflections and every original detail. Never recreate, redraw, reinterpret, replace, deform or modify the product. Only realistic movement caused by natural handling is allowed. GARMENT LOCK The clothing is locked to the reference image. Preserve identical colors,

prints, graphics, stitching, seams, texture, fabric, fit, proportions, folds, drape and every original garment detail. Never redesign, recreate, reinterpret, replace or modify any clothing element. FACE LOCK Maintain identical facial identity throughout the video. Preserve facial proportions, jawline, eyes, eyebrows, nose, lips, ears, hairstyle, hairline, skin tone and skin texture. No identity drift. No facial morphing. No age changes.HAND PHYSICS Correct anatomy. Five fingers on each hand. Natural wrist rotation. Realistic finger articulation. No clipping. No merged fingers. No extra fingers. No impossible hand positions.CAMERA Real smartphone recording. Vertical 9:16. Natural handheld micro-shake. Smooth autofocus. Stable exposure. Natural white balance. No digital zoom unless explicitly requested. No cinematic movement.REALISM Perfect temporal consistency. Preserve identical identity, clothing, product, lighting, reflections and environment throughout the video. Realistic skin texture, authentic hair physics, advanced cloth simulation and physically accurate object interaction. RESTRICTIONS No identity drift. No facial morphing. No clothing morphing. No product deformation. No logo changes. No print distortion. No color changes. No texture changes. No added or removed details. No body deformation. No extra limbs. No extra fingers. No robotic movement. No flickering. No CGI. No AI artifacts.

Output must be completely silent.

The subject naturally continues from the previous movement with perfect temporal consistency. Every transition is smooth and physically accurate.

She performs the main demonstration using relaxed body language, realistic hand interaction and subtle body adjustments. The product remains perfectly stable while being handled naturally. Clothing follows realistic fabric physics without stretching, morphing or changing appearance.

Maintain identical identity, facial geometry, clothing, accessories, product, lighting, reflections and background. No frame-to-frame variation is allowed. GENERAL MOTION

Natural human biomechanics. Independent breathing. Independent blinking. Realistic weight transfer. Natural balance corrections. Authentic hand articulation. Relaxed shoulders. Smooth body mechanics. Natural acceleration and deceleration. No robotic timing. No repeated animation.PRODUCT LOCK

The product is locked to the reference image. Preserve identical shape, proportions, size, color, graphics, labels, logos, texture, materials, reflections and every original detail. Never recreate, redraw, reinterpret, replace, deform or modify the product. Only realistic movement caused by natural handling is allowed. GARMENT LOCK

The clothing is locked to the reference image. Preserve identical colors, prints, graphics, stitching, seams, texture, fabric, fit, proportions, folds, drape and every original garment detail. Never redesign, recreate, reinterpret, replace or modify any clothing element. FACE LOCK

Maintain identical facial identity throughout the video. Preserve facial proportions, jawline, eyes, eyebrows, nose, lips, ears, hairstyle, hairline, skin tone and skin texture. No identity drift. No facial morphing. No age changes.HAND PHYSICS

Correct anatomy. Five fingers on each hand. Natural wrist rotation. Realistic finger articulation. No clipping. No merged fingers. No extra fingers. No impossible hand positions.CAMERA

Real smartphone recording. Vertical 9:16. Natural handheld micro-shake. Smooth autofocus. Stable exposure. Natural white balance. No digital zoom unless explicitly requested. No cinematic movement.REALISM

Perfect temporal consistency. Preserve identical identity, clothing, product, lighting, reflections and environment throughout the video. Realistic skin texture, authentic hair physics, advanced cloth simulation and physically accurate object interaction. RESTRICTIONS

No identity drift. No facial morphing. No clothing morphing. No product deformation. No logo changes. No print distortion. No color changes. No texture changes. No added or removed details. No body deformation. No extra limbs. No extra fingers. No robotic movement. No flickering. No CGI. No AI artifacts.

FRAME 1 (0–8s)

AUDIO SETTINGS

Generate VIDEO ONLY.

No audio.
No narration.
No voice.
No speech.
No dialogue.
No conversation.
No lip sync.
No jaw movement.
No mouth articulation.
No singing.
No music.
No background music.
No ambient sound.
No sound effects.
No ASMR.

Output must be completely silent.

The first frame must be pixel-identical to the reference image. Preserve identical identity, facial geometry, hairstyle, clothing, accessories, product, lighting, reflections, environment and framing.

The subject naturally raises the lip gloss toward the camera using one smooth, controlled motion. The product moves very close to the lens until it fills most of the frame while remaining perfectly sharp and identical to the reference. The autofocus smoothly locks onto the lip gloss, clearly revealing its packaging, label, color, texture and applicator without any distortion. The subject holds the product steady for about two seconds, then naturally lowers it slightly while maintaining relaxed breathing, subtle blinking and realistic body posture.

PRODUCT LOCK

The lip gloss must remain 100% identical to the reference image. Preserve exactly the same packaging, cap, applicator, label, logo, colors, transparency, reflections, proportions, texture and every original detail. Never deform, recreate, redraw, reinterpret or modify the product. Only natural movement caused by realistic hand motion is allowed. GENERAL MOTION

Natural human biomechanics. Independent breathing. Independent blinking. Realistic weight transfer. Natural balance corrections. Authentic hand articulation. Relaxed shoulders. Smooth body mechanics. Natural acceleration and deceleration. No robotic timing. No repeated animation.PRODUCT LOCK

The product is locked to the reference image. Preserve identical shape, proportions, size, color, graphics, labels, logos, texture, materials, reflections and every original detail. Never recreate, redraw, reinterpret, replace, deform or modify the product. Only realistic movement caused by natural handling is allowed.GARMENT LOCK

The clothing is locked to the reference image. Preserve identical colors, prints, graphics, stitching, seams, texture, fabric, fit, proportions, folds, drape and every original garment detail. Never redesign, recreate, reinterpret, replace or modify any clothing element. FACE LOCK

Maintain identical facial identity throughout the video. Preserve facial proportions, jawline, eyes, eyebrows, nose, lips, ears, hairstyle, hairline, skin tone and skin texture. No identity drift. No facial morphing. No age changes. HAND PHYSICS

Correct anatomy. Five fingers on each hand. Natural wrist rotation. Realistic finger articulation. No clipping. No merged fingers. No extra fingers. No impossible hand positions. RESTRICTIONS

No identity drift. No facial morphing. No clothing morphing. No product deformation. No logo changes. No print distortion. No color changes. No texture changes. No added or removed details. No body deformation. No

extra limbs. No extra fingers. No robotic movement. No flickering. No CGI. No AI artifacts.

Gloss viralizado

START FROM THE EXACT REFERENCE IMAGE.

Preserve the influencer exactly as shown, including identity, facial features, hairstyle, skin tone, body proportions, clothing, pose, framing, lighting and composition.

The product is permanently locked.

Keep the product 100% identical to the reference throughout the entire video.

Never replace, regenerate, morph, deform, resize, reinterpret or modify the product.

Never change the packaging, colors, logo, labels, typography, artwork, texture, finish, proportions or shape.

The product remains perfectly centered.

The influencer naturally holds the product with both hands just below her chin.

Both hands support the sides and bottom without covering the branding.

She begins by softly tapping her fingernails on the front and sides of the packaging in a gentle ASMR rhythm while making three subtle showcase wrist movements.

She slightly lifts the right side of the product, then returns to center.

She slightly lifts the left side of the product, then returns to center.

She slightly tilts the top of the product toward the camera, then returns to center.

Natural reflections glide across the packaging.

She then gently rotates the product toward herself using both hands.

Only the orientation changes.

The packaging remains completely identical.

She looks directly at the front of the product.

She smiles softly with a satisfied expression, as if silently thinking:

"Hmmm... very good."

She never speaks.

Her lips remain naturally closed.

She gently rotates the product back until the front perfectly faces the camera again.

Without changing the product in any way, she slowly and smoothly brings it toward the camera in one continuous movement.

The movement is natural, steady and controlled, allowing the viewer enough time to clearly read the product name, logo and packaging details.

The front of the product continuously faces the camera during the approach.

Only her hands, wrists and arms move naturally.

The product never changes in any way.

The product gradually fills the frame while remaining perfectly sharp.

The influencer naturally disappears behind the product.

The product completely covers the camera lens.

The final frame becomes completely black.

STYLE

Ultra-realistic.

Luxury UGC.

Premium ASMR unboxing aesthetic.

Smooth natural movements.

Professional product presentation.

No sudden movements.

No product replacement.

No product morphing.

No product deformation.

No packaging changes.

No hand deformation.

No extra fingers.

No extra objects.

No camera shake.

Maintain perfect focus on the product throughout the entire video.

AUDIO

Soft realistic fingernail tapping on the packaging.

Natural handling sounds only.

No speech.

No voice.

No narration.

No lip sync.

No music.

No artificial sound effects.

UNIVERSAL VIDEO PROMPT — ANY CLOTHING ITEM / COMPLETELY NEUTRAL ENVIRONMENT / B-ROLL / MAX FIDELITY / REAL SCALE

Use the attached clothing reference image as the ABSOLUTE VISUAL SOURCE OF TRUTH.

Create an ultra-photorealistic vertical POV product video (9:16) showing ONLY the exact clothing item or items visible in the reference image.

PRODUCT IDENTITY LOCK — HIGHEST PRIORITY:

Automatically identify the exact type and quantity of clothing items visible in the reference.

Preserve exactly the original:

*** type**

*** shape**

*** proportions**

*** real-world scale**

*** color**

*** print or pattern**

*** fabric**

*** texture**

*** stitching**

*** seams**

*** edges**

*** trims**

*** folds**

*** structural elements**

*** all visible details**

Do NOT assume any specific clothing category.

Do NOT add, remove, redesign, simplify, duplicate or reinterpret any element.

The exact same product must remain visually consistent in every shot.

SCENE — COMPLETELY NEUTRAL:

Place the product on a simple, clean, neutral surface.

Use a soft matte surface in beige, off-white, cream or light neutral gray.

The background must remain minimal, uncluttered and visually anonymous.

No identifiable room type.

No bedroom context.

No kids bedroom.

No nursery.

No living room.

No closet.

No dressing room.

No boutique.

No store.

No showroom.

No hotel.

No furniture that suggests a specific location.

No toys.

No books.

No decorations.

No plants.

No wall art.

No personal belongings.

No lifestyle props.

The environment must NOT suggest age, gender, social class, country or specific lifestyle.

Only a subtle neutral background with realistic natural depth.

The PRODUCT is always the dominant visual element.

VIDEO STRUCTURE — 8 SECONDS:

0.0–1.5s — HERO SHOT:

Show the exact product naturally resting on the neutral surface.

The complete product is clearly visible with correct real-world proportions and natural fabric gravity.

1.5–3.0s — B-ROLL DETAIL 1:

Cut naturally to a closer view of ONE real detail that actually exists on the reference product.

Show fabric texture, stitching, seam, print, edge, trim or another genuine detail.

Never invent details.

3.0–4.5s — ONE-HAND INTERACTION:

Cut to ONLY ONE adult feminine hand gently interacting with the product.

The movement automatically adapts to the actual type of garment.

The hand performs ONE subtle natural action: gently touching, smoothing or slightly lifting an appropriate outer section of the fabric.

Do not require a collar, sleeve, waistband, strap or other specific structure unless it actually exists in the reference.

Do NOT pull, stretch or deform the product.

Only one hand is visible.

4.5–6.0s — B-ROLL DETAIL 2:

Cut to another authentic detail of the product.

Show textile fibers, folds, thickness, seams, print clarity, stitching or another detail that genuinely exists.

The product identity remains completely unchanged.

6.0–8.0s — FINAL HERO SHOT:

Return to a clean product-focused composition.

Show the exact garment naturally arranged on the same neutral surface.

Keep the product sharp, correctly scaled and completely recognizable.

Hold naturally until the end.

CAMERA:

Vertical 9:16.

Realistic modern iPhone rear-camera appearance.

Natural top-down or slightly angled POV depending on the product.

Camera perspective automatically adapts to show the garment clearly.

Camera position may change between intentional B-roll cuts.

Within each shot, maintain only extremely subtle realistic handheld micro-movements.

No dramatic zoom.

No camera orbit.

No rotation.

No excessive movement.

LIGHTING:

Soft natural daylight from one side.

Neutral white balance.

Stable exposure.

Realistic soft shadows.

Natural highlights revealing fabric texture.

No colored lighting.

No dramatic cinematic lighting.

No artificial glow.

No excessive contrast.

FABRIC PHYSICS:

Realistic gravity and material behavior.

The fabric must react according to its apparent weight, thickness and structure.

No morphing.

No stretching.

No melting.

No breathing fabric.

No autonomous movement.

No changing shape.

HAND:

ONLY ONE adult feminine hand during interaction.

Natural anatomy.

Five fingers.

Realistic joints.

Natural nails.

Realistic skin texture.

No second hand.

No extra fingers.

No duplicated hand.

No deformed anatomy.

AUDIO:

No dialogue.

No speech.

No voiceover.

No music.

Only extremely subtle natural room ambience and realistic fabric-contact sounds.

STYLE:

Ultra-realistic premium UGC.

Authentic smartphone recording.

Realistic textile micro-details.

Natural imperfections.

No studio-perfect appearance.

No CGI appearance.

STRICT RULES:

Use ONLY the pieces actually visible in the reference.

Automatically adapt to ANY clothing item.

Maintain EXACT product identity in every shot.

Maintain exact quantity.

Maintain real-world scale.

Do not change colors.

Do not change prints.

Do not change fabric.

Do not change proportions.

Do not invent structural elements.

Do not remove existing details.

Do not transform the garment into another type.

Do not duplicate products.

Only ONE adult hand when interaction occurs.

Keep the environment COMPLETELY NEUTRAL throughout the entire video.

TECHNICAL PARAMETERS:

model: veo-3

length: 8 seconds

resolution: 1080x1920

framerate: 24fps

aspect_ratio: 9:16

NEGATIVE PROMPT:

bedroom, kids bedroom, nursery, living room, closet, dressing room, boutique, store, showroom, hotel, crib, bed, sofa, chair, wardrobe, clothing rack, shelves, toys, plush toys, books, plants, wall art, decorations, personal belongings, lifestyle props, identifiable location, busy background, colorful background, altered garment, redesigned garment, wrong garment type, changed print, changed color, color shift, wrong scale, altered proportions, invented details, missing details, duplicated garment, disappearing garment, garment morphing, melting fabric, stretched garment, warped fabric, fake folds, floating garment, two hands, multiple hands, extra fingers, missing fingers, fused fingers, deformed hand, mannequin, unnecessary people, CGI, 3D render, plastic fabric, synthetic texture, AI artifacts, excessive blur, blurry product, dramatic zoom, camera orbit, excessive camera shake, oversaturated colors, artificial glow, text, subtitles, logo, watermark

A cena acontece em um único plano-sequência contínuo, sem cortes, sem transições, sem zoom e com a câmera completamente fixa em visão superior/primeira pessoa, preservando exatamente o enquadramento da imagem de referência.

A IMAGEM DE REFERÊNCIA É A ÚNICA FONTE PARA DETERMINAR AS PEÇAS.

Antes da ação, identifique visualmente quantas peças de roupa distintas existem na imagem de referência. Durante o vídeo, utilize EXATAMENTE essas peças, uma única vez cada.

NÃO existe quantidade pré-definida.

Se a referência possuir 1 peça, utilize somente 1.
Se possuir 2 peças, utilize somente 2.
Se possuir 3 peças, utilize somente 3.
Se possuir mais peças, repita o processo somente até completar exatamente todas as peças visíveis na referência.

NUNCA invente peças adicionais e NUNCA duplique uma peça para aumentar a quantidade.

Preserve exatamente cada peça da referência: tipo de roupa, formato, cor, estampa, tecido, detalhes, gola, mangas, costuras, proporções e características visuais.

NO PRIMEIRO FRAME, A CAMA ESTÁ COMPLETAMENTE VAZIA.

Nenhuma das peças da imagem de referência está inicialmente sobre a cama. A superfície encontra-se totalmente livre.

A influenciadora aparece somente através de UMA mão feminina e parte do antebraço. A segunda mão nunca aparece em nenhum momento.

AÇÃO PARA CADA PEÇA:

A mesma mão traz UMA das peças da referência para dentro do enquadramento, segurando-a naturalmente pela região superior apropriada da própria peça.

Ela aproxima rapidamente a peça da câmera por aproximadamente 1 segundo, permitindo visualizar seus detalhes.

Em seguida, afasta a peça da câmera e a coloca cuidadosamente sobre a cama.

Com a MESMA mão, realiza pequenos movimentos rápidos e naturais para alisar e organizar o tecido.

Depois disso, a mão traz a próxima peça existente na imagem de referência e repete exatamente o mesmo processo:

• segura a peça com uma única mão;
• aproxima rapidamente da câmera;
• mostra seus detalhes;
• afasta;
• coloca sobre a cama;
• alisa o tecido;
• realiza pequenos ajustes naturais.

Esse processo é repetido SOMENTE pela quantidade de peças realmente existentes na imagem de referência.

Cada peça entra na cena apenas no momento em que é apresentada pela mão. Nenhuma peça pode surgir espontaneamente, aparecer antecipadamente ou materializar-se sobre a cama.

Durante a organização, mantenha espaço suficiente entre as peças para permitir movimentos naturais sem sobreposição excessiva.

À medida que a sequência avança, a mesma mão pode realizar pequenos ajustes de posicionamento para construir progressivamente a composição final.

NO FINAL, todas e somente as peças presentes na imagem de referência devem estar sobre a cama.

A disposição final deve reproduzir o mais fielmente possível a imagem de referência, preservando posição, orientação, ordem, alinhamento, espaçamento e eventuais sobreposições existentes na composição original.

Se a referência mostrar peças sobrepostas, a sobreposição acontece somente durante os ajustes finais.

Se a referência mostrar peças separadas, elas permanecem separadas.

MOVIMENTO:

Os movimentos devem ser rápidos, simples, naturais e humanos, como uma pessoa real organizando roupas para um vídeo UGC.

Adicionar pequenas imperfeições naturais nos movimentos da mão e dos dedos. Nada deve parecer robótico, coreografado ou artificial.

A câmera permanece 100% imóvel durante toda a sequência.

IMPORTANTE:

A cama começa COMPLETAMENTE VAZIA.

Use SOMENTE as peças realmente visíveis na imagem de referência.

A quantidade de peças é determinada automaticamente pela referência.

NÃO adicionar peças extras.

NÃO duplicar peças.

NÃO remover nenhuma peça existente na referência.

Cada peça aparece UMA ÚNICA VEZ.

Cada peça entra individualmente através da mesma mão.

Somente UMA mão e parte do antebraço podem aparecer.

A segunda mão NUNCA aparece.

Nenhuma peça surge magicamente sobre a cama.

Nenhuma peça pode estar presente antes de ser trazida pela mão.

Cada peça é rapidamente apresentada à câmera antes de ser colocada.

Preservar rigorosamente identidade, cor, formato e detalhes de cada peça.

A composição final deve corresponder à disposição mostrada na referência.

Plano-sequência único.

SEM cortes.

SEM transições.

SEM zoom.

SEM movimento de câmera.

SEM troca de enquadramento.

SEM texto.

SEM interface.

SEM elementos adicionados.

Estilo UGC ultra-realista, gravado com celular, movimentos espontâneos, física realista dos tecidos, gravidade natural e nenhuma aparência de IA.

—----------

POV adicionando peças em cena
💡
neutro qualquer peça

A cena acontece em um único plano-sequência contínuo, sem cortes, sem zoom e com a câmera completamente fixa em primeira pessoa, exatamente no mesmo enquadramento da imagem de referência.

NO PRIMEIRO FRAME A CAMA ESTÁ COMPLETAMENTE VAZIA. Não existe absolutamente nenhuma roupa sobre a cama. A superfície da cama está totalmente livre.

A influenciadora aparece apenas com UMA das mãos e parte do antebraço visíveis durante toda a cena. A outra mão nunca aparece.

Ela segura a ultima blusa apenas pela gola, aproxima rapidamente da câmera por cerca de 1 segundo para apresentar a peça e, em seguida, coloca cuidadosamente sobre a cama em uma posição livre.

Com movimentos rápidos, naturais e humanos, ela alisa o tecido e faz pequenos ajustes até deixá-la bem posicionada.

Depois, ela pega a segunda blusa, novamente segurando apenas pela gola com a mesma mão, aproxima da câmera para mostrar rapidamente os detalhes e coloca sobre a cama deixando um espaço suficiente entre as peças para não ficarem sobrepostas durante a organização.

Depois, ela pega a terceira blusa, novamente segurando apenas pela gola com a mesma mão, aproxima da câmera para mostrar rapidamente os detalhes e coloca sobre a cama deixando um espaço suficiente entre as peças para não ficarem sobrepostas durante a organização.

Ela faz pequenos ajustes naturais no tecido.

Repete exatamente o mesmo processo com todas as demais peças:

• Segura pela gola com apenas uma mão.
• Aproxima rapidamente da câmera.
• Coloca sobre a cama.
• Alisa o tecido.
• Ajusta a posição.

Cada nova peça é posicionada respeitando um espaçamento natural, evitando que uma fique em cima da outra durante a montagem.

Somente ao final da organização todas as peças ficam exatamente na mesma disposição da imagem de referência, mantendo a ordem, alinhamento e composição final.

Os movimentos devem parecer gravados por uma pessoa real organizando roupas para mostrar aos seguidores, com pequenas imperfeições naturais, ritmo espontâneo e aparência totalmente humana.

IMPORTANTE:
- A cama começa COMPLETAMENTE VAZIA.
- Nenhuma roupa pode aparecer antes de ser colocada pela influenciadora.
- Apenas UMA mão aparece durante toda a cena.
- A outra mão nunca entra no enquadramento.
- Cada peça surge uma de cada vez.
- Cada peça é apresentada rapidamente para a câmera antes de ser colocada.
- As peças ficam inicialmente separadas durante a organização.
- Apenas no final elas assumem exatamente a composição da imagem de referência.
- Plano sequência único.
- Sem cortes.

- Sem transições.
- Sem zoom.
- A câmera nunca se move.
- Estilo UGC ultra-realista, aparência de vídeo gravado com celular, totalmente natural e sem aspecto de IA.

Pov cabide qualquer roupa
{
"prompt": "ULTRA-PHOTOREALISTIC iPhone POV VIDEO. Use the provided reference image as the ABSOLUTE SOURCE OF TRUTH for the lingerie product. The exact same product must remain visually consistent from the first frame to the last frame. Do not redesign, reinterpret, reconstruct, beautify or modify the garment in any way.\n\nPRODUCT IDENTITY LOCK — HIGHEST PRIORITY:\nPreserve the exact original lingerie design, silhouette, proportions, dimensions, color, material, lace pattern, embroidery, stitching, seams, trims, straps, bow, elastic bands, edges, transparency and fabric texture exactly as shown in the reference. Every product detail must remain consistent throughout the entire video. No new details may appear and no existing details may disappear.\n\nSCENE — NEUTRAL ENVIRONMENT:\nA clean, simple and completely neutral real-world interior. Soft off-white, beige and light neutral tones. Plain walls and an uncluttered background with only subtle natural depth. No identifiable location, no boutique elements, no clothing racks, no shelves filled with products, no bedroom furniture, no showroom appearance and no decorative elements competing with the product. The environment must feel realistic, calm and naturally lived-in while remaining visually neutral. The product is always the dominant visual element.\n\nPRODUCT PRESENTATION:\nThe exact reference lingerie is hanging naturally from a simple light wooden hanger with NO text, NO branding and NO logo. The garment hangs vertically in a natural position. Preserve the exact original orientation, proportions and structure. Straps remain correctly positioned. The garment must never stretch, shrink, twist, fold unnaturally or change shape.\n\nHAND INTERACTION:\nONLY ONE ADULT FEMALE HAND is visible. The hand enters naturally from the lower side of the frame and gently holds the wooden hanger near the hook or lower bar. The hand remains relaxed and anatomically correct.\n\nThe hand performs ONLY ONE subtle gesture: the fingertips briefly and gently touch

the outer edge of the garment for approximately one second, then return to a relaxed position on the hanger.\n\nDo NOT pull, stretch, pinch, squeeze or lift the fabric. Do NOT move the hand across the center of the garment or cover important product details.\n\nHAND ANATOMY:\nRealistic adult feminine hand, natural skin texture, anatomically correct wrist and fingers, five clearly separated fingers, realistic joints and natural proportions. Relaxed finger positioning. No extra, missing, fused, twisted or elongated fingers and no deformed wrist.\n\nNAILS AND JEWELRY:\nNeatly manicured feminine nails with a subtle glossy finish. One or two delicate minimal rings may be visible. No bracelets and no watch.\n\nCAMERA MOVEMENT:\nRealistic handheld iPhone POV recording. Start with medium-wide framing where the entire garment and hanger are clearly visible. The camera makes ONE extremely slow and subtle forward movement toward the product, similar to a real person naturally bringing the phone slightly closer to inspect the fabric.\n\nThe camera movement is smooth, continuous and physically realistic with extremely subtle handheld micro-movements. No dramatic movement. THE CAMERA MOVES CLOSER — THE PRODUCT DOES NOT MOVE.\n\nTIMELINE — 8 SECONDS:\n0.0–2.0s: Entire garment and hanger visible against the neutral background. Camera stable with tiny natural handheld movement. One female hand holds the hanger.\n\n2.0–4.0s: Camera begins one very slow forward movement. Hand remains relaxed and garment remains stable.\n\n4.0–5.5s: Fingertips gently touch the outer edge of the garment once, briefly highlighting the fabric texture without pulling or repositioning it.\n\n5.5–7.0s: Hand returns to its relaxed position. Camera continues its subtle approach, naturally revealing more lace, stitching and fabric detail.\n\n7.0–8.0s: Camera stops naturally. Garment remains centered and recognizable. Hold the final composition briefly.\n\nFOCUS:\nThe entire product remains the primary subject. Gradually reveal textile detail through natural camera proximity. No independent close-up shots, aggressive cropping or reconstruction of the product.\n\nFABRIC PHYSICS:\nMaintain realistic weight, gravity, folds, lace structure and natural drape. Only minimal secondary movement caused by the hand is permitted. The garment must NOT wave, ripple, breathe, morph, stretch or deform.\n\nLIGHTING:\nSoft natural daylight entering from one side. Neutral white balance, stable exposure, physically realistic soft shadows and subtle highlights on the material. No dramatic cinematic lighting, colored lighting, artificial glow or beauty lighting.\n\nTEXTURE FIDELITY:\nPreserve visible lace fibers, embroidery, stitching threads, fabric grain, elastic texture and natural material response. Realistic skin pores and

nail texture. No smoothing, plastic appearance or synthetic CGI texture.\n\nVISUAL STYLE:\nNatural premium UGC product content with authentic smartphone realism. Simple, clean, spontaneous and believable. The neutral environment must never compete visually with the product.\n\nAUDIO:\nNo voice, speech, dialogue or lip-sync. Only extremely subtle natural room ambience. No music.\n\nCAMERA:\nModern iPhone camera aesthetic, approximately 26–28mm equivalent lens, realistic smartphone depth of field, natural sharpness, subtle sensor noise, realistic exposure, slight handheld imperfections and authentic smartphone image processing.\n\nABSOLUTE RULES:\nSame product, design, color, material, straps, lace, embroidery and proportions from first frame to last frame. No redesign. No deformation. No stretching. No morphing. No added or removed garment elements. No duplicated garment. No disappearing details. No face visible. No body visible. No person wearing the product. No mannequin. No text or branding on the hanger. Neutral background throughout the entire sequence.\n\nFINAL GENERATION PRIORITY:\n1. Product identity and visual consistency.\n2. Realistic hand anatomy.\n3. Natural physical fabric behavior.\n4. Smooth human camera movement.\n5. Clean neutral environment.\n6. High-detail smartphone realism.",

pov caindo roupas na cama

💡

use foto do produto de referencia que deseja em cores variadas (qualquer roupa) adicione no seu gerador de videos com o prompt e gere o video.

A cena acontece em **UM ÚNICO PLANO-SEQUÊNCIA CONTÍNUO, sem cortes, transições ou zoom. A câmera permanece **100% fixa em visão superior (top-down)**, exatamente no enquadramento da imagem de referência.**

INÍCIO

A cama começa **COMPLETAMENTE VAZIA, sem nenhuma roupa ou objeto.**

Logo após o início, diversas peças de roupa começam a ser **JOGADAS FISICAMENTE DE FORA DO ENQUADRAMENTO para cima da cama.**

As peças entram exclusivamente pelas bordas superior e laterais. Nenhuma roupa pode surgir ou aparecer magicamente sobre a cama.

Elas caem rapidamente e de maneira irregular, girando no ar, dobrando, amassando, quicando levemente no colchão, deslizando e colidindo umas com as outras com física realista.

CRÍTICO — ESTAMPAS E CORES DA REFERÊNCIA

****TODAS AS ROUPAS QUE CAEM DEVEM SER BASEADAS EXCLUSIVAMENTE NAS PEÇAS MOSTRADAS NA IMAGEM DE REFERÊNCIA.****

Não jogar roupas com estampas, cores ou designs aleatórios.

As peças que caem devem repetir visualmente **AS MESMAS CORES, ESTAMPAS, PADRÕES, TEXTOS, DESENHOS E IDENTIDADE VISUAL DAS ROUPAS DA REFERÊNCIA.**

Se a referência possuir mais de uma peça, usar as características visuais dessas peças durante toda a chuva de roupas.

****NÃO INVENTAR NOVAS ESTAMPAS.****
****NÃO ALTERAR TEXTOS OU DESENHOS.****
****NÃO TROCAR AS CORES.****
****NÃO INTRODUZIR ROUPAS VISUALMENTE DIFERENTES DA REFERÊNCIA.****

As peças podem cair em diferentes posições, orientações e níveis de amassado, porém devem continuar claramente pertencendo ao **MESMO PRODUTO/CONJUNTO E À MESMA ESTAMPA DA REFERÊNCIA.**

FORMAÇÃO DA PILHA

As roupas continuam caindo rapidamente, formando progressivamente uma **grande montanha de peças com a identidade visual da referência.**

Cada peça reage fisicamente às outras.

A pilha fica alta, volumosa, irregular e completamente bagunçada.

Nenhuma peça é organizada ou perfeitamente dobrada.

Partes das roupas ficam visíveis em diferentes posições, permitindo reconhecer repetidamente **as cores e estampas originais da referência espalhadas pela pilha.**

FINAL

Quando a queda termina, **APENAS UMA MÃO da influenciadora entra pela parte inferior.**

A mão pega **UMA DAS PEÇAS EXATAMENTE IGUAL À REFERÊNCIA, levanta somente alguns centímetros para destacá-la e a posiciona delicadamente no topo da montanha.**

Se a referência mostrar um conjunto, preservar fielmente suas peças, cores, estampas, modelagem e detalhes.

REGRAS ABSOLUTAS

*** Primeiro frame = cama 100% vazia.**
*** Todas as roupas entram fisicamente de fora do quadro.**
*** **TODAS as peças que caem usam as estampas/cores/designs da referência.****
*** Não criar roupas genéricas com estampas diferentes.**
*** Não inventar novas cores ou padrões.**
*** Preservar textos e desenhos originais.**
*** Queda rápida, dinâmica e irregular.**
*** Grande quantidade de peças.**
*** Pilha alta, volumosa e desorganizada.**
*** Física realista de tecido e gravidade.**
*** Apenas UMA mão aparece no final.**
*** Câmera 100% fixa e top-down.**
*** NUNCA trocar de cenário.**
*** Sem zoom, pan ou tilt.**
*** Sem cortes ou transições.**
*** Sem teleportes.**
*** Iluminação natural e constante.**
*** Aparência UGC de smartphone.**
*** Ultra-realista 4K, sem aparência de IA.**

****ORDEM OBRIGATÓRIA: CAMA TOTALMENTE VAZIA → MUITAS ROUPAS COM AS MESMAS ESTAMPAS/CORES DA REFERÊNCIA CAEM DE FORA DO QUADRO → FORMAM UMA GRANDE PILHA BAGUNÇADA → UMA MÃO ENTRA → PEGA UMA PEÇA IDÊNTICA À REFERÊNCIA → LEVANTA → COLOCA NO TOPO.****

—----------

pov abrindo saco
💡
use a imagem da peça que deseja divulgar e a do saco que esta aqui

A câmera permanece **totalmente fixa em visão superior (top-down), exatamente como na imagem de referência. O enquadramento, iluminação, cama, manta, cenário e mãos permanecem idênticos durante toda a**

gravação. Aparência autêntica de vídeo UGC feito com smartphone, com movimentos rápidos, naturais e humanos.

INÍCIO

A cena começa **EXATAMENTE como na imagem de referência: as duas mãos já estão segurando **UM ÚNICO pacote transparente contendo UMA ÚNICA peça de roupa dobrada**.**

A peça dentro da embalagem deve ser **EXATAMENTE A MESMA PEÇA mostrada na imagem de referência, independentemente de ser camiseta, shorts, calça, blusa, vestido, top, saia ou qualquer outro tipo de roupa.**

A imagem de referência é a **ÚNICA fonte para determinar o produto.**

AÇÃO

Sem hesitar, a influenciadora rasga rapidamente a **parte frontal da embalagem plástica usando as duas mãos, criando uma abertura ampla em um único movimento fluido e fisicamente realista.**

Assim que o plástico se rompe, ela imediatamente segura **A MESMA PEÇA através da abertura e começa a puxá-la parcialmente para fora da embalagem.**

O movimento é rápido e natural, como alguém abrindo uma compra recém-chegada para mostrar o produto.

A peça permanece **DOBRADA durante toda a retirada e apresentação, mantendo aparência de produto novo.**

Ela levanta levemente a peça dobrada para exibi-la à câmera, sem retirá-la completamente do enquadramento.

REFERENCE LOCK — PRODUTO

Preservar exatamente todas as características da peça da referência:

*** tipo da roupa;**

*** cor;**
*** estampa;**
*** textos;**
*** desenhos;**
*** tecido;**
*** textura;**
*** modelagem;**
*** costuras;**
*** etiquetas;**
*** proporções;**
*** acabamento;**
*** todos os detalhes originais.**

****NÃO reinterpretar, redesenhar ou substituir o produto.****

A peça que aparece dentro do pacote é **EXATAMENTE A MESMA que é puxada para fora.**

SEQUÊNCIA OBRIGATÓRIA

****MÃOS SEGURANDO PACOTE → RASGAR PLÁSTICO → CRIAR ABERTURA → SEGURAR A PEÇA → PUXAR PARCIALMENTE PARA FORA → LEVANTAR LEVEMENTE PARA EXIBIÇÃO.****

Tudo acontece em **UM ÚNICO MOVIMENTO CONTÍNUO, sem pausas artificiais.**

REGRAS

*** Câmera 100% fixa e top-down.**
*** Exatamente UM pacote.**
*** Exatamente UMA peça.**
*** Exatamente DUAS mãos.**
*** Produto definido exclusivamente pela referência.**
*** Peça permanece dobrada.**
*** Rasgo rápido e realista na frente da embalagem.**
*** Não criar roupas extras.**
*** Não duplicar produto.**
*** Não trocar a peça durante a retirada.**

*** Não deformar tecido, embalagem ou mãos.**
*** Não alterar cores, estampas ou detalhes.**
*** Sem cortes ou transições.**
*** Sem zoom, pan ou tilt.**
*** Sem teleportes.**
*** Sem mudança de cenário ou iluminação.**
*** Física natural do plástico e tecido.**
*** Movimento rápido, contínuo e humano.**
*** Aparência autêntica de vídeo TikTok Shop/UGC gravado com smartphone.**
*** Qualidade ultra-realista 4K, sem aparência de IA.**

—----------

pov saco transparente

💡

peça ao chat gpt para colocar sua peça (a que deseja divulgar) em um saco transparente em cima da cama ou bancada de loja.

A câmera permanece totalmente fixa em visão superior (top-down), exatamente como na imagem de referência. O enquadramento, a iluminação suave, o cenário da cama com manta felpuda branca e as mãos da influenciadora permanecem idênticos durante toda a cena. A aparência deve ser de uma gravação real feita com celular, com movimentos rápidos, naturais e humanos.

A cena começa exatamente como na imagem de referência: as duas mãos já seguram o pacote transparente contendo os shorts dobrados. Sem hesitar, a influenciadora rasga rapidamente a parte frontal da embalagem plástica com as duas mãos, criando uma abertura ampla em um único movimento fluido e realista.

Assim que o plástico se rompe, ela imediatamente segura os shorts através da abertura e os puxa parcialmente para fora da embalagem em um gesto rápido e natural, como alguém mostrando o produto recém-chegado. Os shorts permanecem dobrados durante todo o movimento, preservando a aparência de produto novo.

A ação é contínua, sem pausas e sem cortes: rasgar a embalagem → pegar os shorts → levantar levemente para exibição. O movimento completo acontece de forma dinâmica, ideal para vídeo curto de TikTok Shop.

****Regras obrigatórias:****

*** Preservar exatamente o enquadramento da imagem de referência.**
*** Câmera totalmente fixa.**
*** Apenas um único pacote durante toda a cena.**
*** Manter exatamente os mesmos shorts da imagem.**
*** Rasgo rápido e realista na parte frontal da embalagem.**
*** Os shorts permanecem dobrados.**
*** Não criar peças extras.**
*** Não duplicar roupas.**
*** Não deformar roupas ou mãos.**
*** Não trocar de cenário.**
*** Não alterar a iluminação.**
*** Não fazer cortes.**
*** Não fazer transições.**
*** Movimento contínuo e natural.**
*** Aparência de vídeo real gravado com celular.**
*** Qualidade ultra-realista 4K.**
*** Preservar integralmente todas as características originais dos produtos.**

—----------

pov tirando do pacote
💡
não precisa adicionar foto do saco, apenas a foto do produto que deseja que saia do pacote.

A câmera permanece **TOTALMENTE FIXA em visão superior (top-down), exatamente como na imagem de referência. O enquadramento, posição, distância e ângulo da câmera **não mudam em nenhum momento**. Sem zoom, pan, tilt ou movimento de câmera.**

A iluminação permanece natural, suave e uniforme, com aparência autêntica de uma gravação feita com smartphone.

INÍCIO — CAMA TOTALMENTE VAZIA

A cena começa com a **cama completamente vazia.**

Não existe pacote, roupa, produto ou qualquer outro objeto sobre a cama.

Apenas **DUAS mãos humanas e parte dos antebraços da influenciadora podem aparecer durante a interação.**

ENTRADA DO PACOTE

Um **ÚNICO pacote plástico preto, completamente fechado e lacrado, cai naturalmente de fora da parte superior do enquadramento **DIRETAMENTE NAS MÃOS da influenciadora**.**

As mãos recebem o pacote no ar.

****O pacote NÃO pode cair, encostar ou ser colocado sobre a cama em nenhum momento.****

Existe **EXATAMENTE UM pacote durante todo o vídeo.**

Nenhum segundo pacote pode aparecer.

ABERTURA

Segurando o pacote suspenso sobre a cama, ela utiliza as duas mãos para rasgar **SOMENTE A ABERTURA SUPERIOR da embalagem.**

A abertura acontece de maneira física, contínua e natural.

Durante TODO o processo de abertura, **O CONTEÚDO PERMANECE 100% ESCONDIDO DENTRO DA EMBALAGEM.**

Nenhuma parte do produto pode aparecer antes que a abertura esteja concluída.

Não permitir:

*** produto atravessando a embalagem;**
*** produto aparecendo através do plástico;**
*** produto surgindo antecipadamente;**
*** duplicação do conteúdo;**
*** objetos surgindo espontaneamente;**
*** deformações da embalagem.**

RETIRADA — NEUTRO PARA QUALQUER PEÇA

****SOMENTE DEPOIS que a abertura superior estiver completamente aberta**, ela afasta naturalmente as bordas da embalagem.**

Uma das mãos entra fisicamente no interior do pacote e começa a retirar **UMA ÚNICA PEÇA DE ROUPA.**

A PEÇA RETIRADA DEVE SER EXATAMENTE A PEÇA MOSTRADA NA IMAGEM DE REFERÊNCIA.

O modelo de roupa é definido **EXCLUSIVAMENTE pela imagem de referência.**

Pode ser qualquer tipo de peça: camiseta, blusa, vestido, calça, shorts, saia, conjunto ou outra peça apresentada na referência.

****NÃO inventar características da roupa.****

Preservar EXATAMENTE:

*** tipo da peça;**
*** cor;**
*** estampa;**
*** modelagem;**
*** proporções;**
*** tecido;**
*** textura;**
*** costuras;**
*** etiquetas;**
*** acabamentos;**

*** detalhes;**
*** todas as características visuais originais.**

A peça sai **fisicamente de dentro do pacote, progressivamente, acompanhando o movimento das mãos.**

Ela NÃO pode aparecer pronta sobre a cama.

Ela NÃO pode teleportar.

Ela NÃO pode surgir fora da embalagem.

POSICIONAMENTO NA CAMA

Imediatamente após retirar completamente a peça, a influenciadora a posiciona cuidadosamente sobre a cama.

As mãos soltam e ajustam delicadamente o tecido, deixando a peça **naturalmente alinhada, aberta e organizada, respeitando a forma correta da roupa mostrada na referência.**

O tecido reage à gravidade e aos movimentos das mãos com **física realista, criando dobras, pequenas ondulações e movimentos naturais.**

O resultado final deve reproduzir o produto da imagem de referência com máxima fidelidade.

CONTINUIDADE ABSOLUTA

Toda a ação acontece em **UM ÚNICO TAKE CONTÍNUO:**

****CAMA VAZIA → PACOTE CAI NAS MÃOS → MÃOS SEGURAM PACOTE → ABERTURA SUPERIOR É RASGADA → PACOTE É ABERTO → MÃO ENTRA NO PACOTE → UMA ÚNICA PEÇA É RETIRADA → PEÇA É COLOCADA NA CAMA → MÃOS ORGANIZAM A PEÇA.****

Nenhuma etapa pode ser pulada.

Nenhum objeto pode aparecer espontaneamente.

REGRAS OBRIGATÓRIAS

*** Exatamente **UM único pacote** durante toda a cena.**
*** Exatamente **UMA única peça/produto retirada da embalagem**.**
*** A cama começa **100% vazia**.**
*** O pacote cai diretamente nas mãos.**
*** O pacote nunca toca a cama.**
*** O pacote nunca é colocado sobre a cama.**
*** Nenhuma roupa aparece antes da abertura completa.**
*** O conteúdo permanece totalmente escondido enquanto o pacote está sendo aberto.**
*** Retirar somente a peça correspondente à imagem de referência.**
*** Não inventar tipo, cor ou estampa da peça.**
*** Não duplicar roupas.**
*** Não criar produtos extras.**
*** Não deformar embalagem, mãos ou roupas.**
*** Anatomia humana natural.**
*** Duas mãos, cinco dedos em cada mão.**
*** Física realista do tecido e da embalagem.**
*** Câmera 100% fixa.**
*** Visão top-down fixa.**
*** Sem zoom.**
*** Sem pan.**
*** Sem tilt.**
*** Sem cortes.**
*** Sem transições.**
*** Sem teleportes.**
*** Sem troca de cenário.**
*** Sem objetos surgindo do nada.**
*** Iluminação consistente durante todo o vídeo.**
*** Movimentos naturais, rápidos e humanos.**
*** Autêntica aparência UGC gravada com smartphone.**
*** Qualidade ultra-realista 4K.**
*** Nenhuma aparência de CGI ou vídeo gerado por IA.**

pov calçado

💡

neutro qualquer calçado

POV shot looking down at feet, 9:16. Subject wearing shoes, performs subtle foot movements — weight shift, small step. Natural floor/ground setting. No mouth movement. 8 seconds. Silent video.

—----------

pov roupa 1

Use the provided reference image as the exact first frame and as the sole authoritative source for every garment visible in the scene.

Create one continuous ultra-photorealistic vertical 9:16 fashion product demonstration video.

The scene contains one or more garments arranged on a real surface, such as a bed, table, sofa, rug, linen backdrop or another surface already visible in the reference.

Before beginning the action, visually identify every physically distinct garment in the image.

Select exactly one real garment from the reference to present.

The selected garment must be one complete physically distinct piece.

Do not combine parts of different garments.

Do not select a decorative prop, accessory, shoe, bag, belt, book, flower or background object.

If the image contains only one garment, select that garment.

If the image contains several garments, select only one of them.

Prefer a garment that is clearly visible, sufficiently separated from the others and can be lifted without disturbing the entire composition.

RANDOMIZED SELECTION LOGIC:

When several garments are available, do not always select the first, largest, nearest or most central garment.

Choose among the real garments using varied selection behavior.

Across separate generations, vary the selected garment whenever the generation system allows variation.

Avoid repeatedly selecting the same garment by default.

Do not use a fixed preference based only on color, position or size.

The selected piece may be:

- a top;
- blouse;
- cropped top;
- bodysuit;
- vest;
- dress;
- skirt;
- shorts;
- trousers;
- cardigan;
- shirt;
- or another real garment present in the reference.

ABSOLUTE PRODUCT FIDELITY LOCK:

The selected garment must remain identical to the reference.

Preserve exactly:

- the garment category;

- the exact color;
- the exact color placement;
- the exact print;
- the exact print position;
- the exact logo;
- the exact written elements;
- the exact neckline;
- the exact collar;
- the exact sleeve length;
- the exact straps;
- the exact buttons;
- the exact button count;
- the exact pockets;
- the exact seams;
- the exact embroidery;
- the exact bows;
- the exact zipper;
- the exact waistband;
- the exact hem;
- the exact garment proportions;
- the exact fabric texture;
- the exact visible construction;
- the exact folds that are not physically changed by handling.

Do not redesign, simplify, beautify or reinterpret the selected garment.

Do not convert the garment into a similar item.

Do not change its length, width, cut, neckline or proportions.

Do not alter the print while the garment approaches the camera.

Do not make the garment transform, regenerate or replace itself during the movement.

UNSELECTED GARMENTS LOCK:

Every garment not selected must remain exactly where it is throughout the entire shot.

Preserve their exact:

- position;
- orientation;
- folds;
- spacing;
- scale;
- colors;
- prints;
- contact shadows;
- relationship with the surface.

The hands must not drag, cover, lift, rotate or displace the unselected garments.

If the selected garment is partially overlapping another piece, lift it carefully and naturally without pulling the other garment.

No other garment may move as a consequence of the action, except for an extremely subtle physically plausible release where the selected garment was resting.

HANDS:

Only one pair of adult feminine hands may appear.

Both hands belong to the same woman.

The hands must remain visually consistent for the entire video.

Show:

- realistic adult female anatomy;
- exactly five fingers on each hand;
- natural finger spacing;
- realistic joints;
- subtle veins;
- fine skin lines;

- visible skin pores;
- realistic knuckles;
- clean cuticles;
- natural nail shapes;
- short-to-medium professionally manicured nails;
- discreet nude, pale pink or neutral nail polish.

No rings.

No bracelets.

No watch.

No artificial nail distortion.

No extra hands.

No third hand.

No duplicated fingers.

No fused fingers.

No detached wrists.

ACTION STRUCTURE:

The camera begins from the exact reference frame.

The scene pauses briefly so the complete arrangement is clearly visible.

The same pair of feminine hands enters naturally from the lower edge of the frame.

The hands move toward the chosen garment with clear intention.

One hand grips the left side of the garment and the other hand grips the right side.

The grip must occur at structurally safe areas such as:

- shoulder edges;
- side seams;
- waistband corners;
- upper corners;
- reinforced edges;
- sleeve openings;
- stable fabric areas.

Do not grip the garment by:

- a fragile strap alone;
- a button;
- a zipper pull;
- embroidery;
- decorative applique;
- loose bow;
- delicate lace;
- thin drawstring;
- print;
- hard ornament.

The hands first separate the selected garment gently from the surface.

Then they lift the garment upward toward the camera in one smooth, continuous movement.

The garment remains facing the camera as much as physically possible.

Keep the front design visible.

The hands maintain the garment open enough to reveal its real silhouette.

Do not stretch it excessively.

Do not pull it unnaturally flat.

Do not fold it in half.

Do not twist it.

Do not shake it.

As the garment rises, show realistic fabric physics:

- natural gravity;
- believable drape;
- gentle fold formation;
- realistic fabric weight;
- subtle movement at loose edges;
- physically correct seam tension;
- natural response to the hands;
- realistic shadow changes;
- accurate depth as the garment approaches the lens.

The selected garment becomes progressively larger in the frame because it is physically approaching the camera.

This must be a real lifting movement, not a digital zoom.

The hands bring the garment close to the camera without touching the lens.

Stop at a comfortable viewing distance where the fabric, stitching, neckline, print or primary design details are clearly visible.

Hold the garment steady near the camera for the final portion of the video.

The final frame must show a close, clear and faithful view of the selected garment.

ONE-WAY ACTION — NO LOOP:

The action occurs exactly once.

The hands enter once.

They select one garment once.

They lift it once.

They approach the camera once.

They hold it near the camera once.

They do not lower the garment back to the surface.

They do not repeat the movement.

They do not return to the initial frame.

They do not place the garment back down.

The final frame must be visually different from the first frame.

The video ends while the garment is still held near the camera.

No seamless loop.

No cyclic movement.

No reverse motion.

No repeated pickup.

No repeated camera approach.

CAMERA:

The camera remains fixed above the composition.

Use an overhead or near-overhead angle between approximately 80 and 90 degrees.

The camera itself does not zoom.

The camera does not orbit.

The camera does not move backward.

The perceived enlargement comes only from the garment physically approaching the lens.

Maintain stable high-quality smartphone or commercial-camera behavior.

Minimal lens distortion.

No fisheye.

No handheld shake.

No sudden focus loss.

Use a natural focus transition from the surface to the garment as it approaches the camera.

Keep the main garment details sharp in the final close-up.

Do not allow autofocus pulsing.

Do not blur the garment completely.

LIGHTING:

Preserve the exact lighting established in the first frame.

Use stable soft natural daylight.

Maintain accurate product colors.

No flicker.

No moving light source.

No changing white balance.

No orange shift.

No blue shift.

No artificial glow.

No exposure pumping as the garment approaches the camera.

Allow only natural physically correct shadow changes caused by the garment being lifted.

REALISM:

The movement must look like a real woman physically choosing one garment from a styled fashion composition and bringing it close to the camera for inspection.

Show:

- realistic hand pressure;
- natural fingertip contact;
- believable garment weight;
- realistic fabric response;
- accurate textile fibers;
- natural folds;
- physically plausible movement;
- subtle room ambience;
- authentic smartphone product-video realism.

Do not create a floating garment.

Do not make the clothing move before being touched.

Do not animate the print.

Do not make the garment rigid like cardboard.

Do not make the fabric liquid, rubbery or weightless.

STRICT NEGATIVE CONSTRAINTS:

No looping.

No return to the first frame.

No repeated action.

No lowering the garment after lifting.

No second garment being selected.

No garment switching during the lift.

No garment transforming into another piece.

No product replacement.

No duplicated garment.

No missing garment.

No altered colors.

No changed print.

No changing logo.

No mirrored writing.

No changing button count.

No changing neckline.

No changing sleeve length.

No changing straps.

No changing waistband.

No changing hem.

No fabric melting.

No floating clothing.

No excessive stretching.

No shaking.

No aggressive pulling.

No extra hands.

No extra fingers.

No fused fingers.

No deformed hands.

No person entering the frame.

No face.

No body.

No mannequin.

No text overlays.

No captions.

No watermark.

Background sounds: soft natural room ambience and realistic fabric movement.
Music: subtle elegant fashion instrumental without vocals, low volume.
Diálogo: nenhum.

1pov conjunto

💡

coloque no reverso que ele faz a peça sendo colocada na cama caso queira.

Create a realistic overhead closing video using the provided image as the starting reference. Keep the camera completely fixed in a top-down position. Preserve the same carpet background, lighting, framing, feminine hands, white nails, bracelets, and the exact clothing arrangement.

The video starts with all clothing pieces already arranged in place. Then the hands begin removing the pieces one by one, not all at once. Each time, the hands pick up only one single piece, pull it smoothly out of the scene to the side, and then come back to remove the next one.

The process should continue step by step:

pick up one piece only

remove it from the frame

return the hands

pick up the next piece only

remove it from the frame

repeat until all pieces are gone

The movements should be smooth, elegant, controlled, and slightly slow. Never remove two pieces together. Never drag all the pieces at once. Each item must leave the scene separately.

The other pieces should remain in place until it is their turn to be removed. The hands should look natural and consistent the whole time.

By the end of the video, all clothing pieces must be removed from the frame, leaving only the empty background visible, creating a clean closing shot.

No camera movement, no zoom, no cuts, no transitions, no extra products, no distorted hands, no deformed fabric, and no removing multiple pieces at once.

Método gringo TRANSIÇÃO - Faceless shop

💡

use sempre a foto da modelo no angulo um pescoço para baixo + a foto das cores da peça de referencia

VIDEO PROMPT — ULTRA REALISTIC | COLOR CHANGE | STRICT NECK-DOWN | FITNESS FASHION | 9:16 | PORTUGUESE VOICEOVER

Create an ultra-realistic vertical 9:16 TikTok Shop UGC fashion video using the provided reference images as the ONLY source of truth.

ABSOLUTE GARMENT LOCK:

Preserve the EXACT garment throughout the entire video.

The ONLY element allowed to change is the GARMENT COLOR, following EXACTLY the provided color references.

DO NOT change:
- **design**
- **cut**
- **shape**
- **fabric**
- **fabric texture**
- **stitching**
- **seams**
- **waistband**
- **pockets**
- **straps**
- **neckline**

• length
• proportions
• fit
• logos
• graphics
• labels
• construction
• any product detail

Every color version must look like THE EXACT SAME PHYSICAL GARMENT in a different referenced color.

Never invent colors.
Use ONLY colors clearly shown in the provided references.

ABSOLUTE NECK-DOWN FRAMING:

Show the model STRICTLY FROM THE NECK DOWN during the ENTIRE video.

The head, face, chin, mouth, nose, eyes and all facial features remain completely OUTSIDE the frame.

NEVER reveal the face, even partially.

PHONE LOCK:

The model continuously holds the smartphone in ONE HAND throughout the ENTIRE video.

She NEVER releases it.
She NEVER switches hands.
She NEVER puts it down.

The phone remains in the SAME hand from the first frame until the final frame.

The other hand is the FREE HAND and performs all garment interactions.

MOVEMENT:

The model naturally presents the fitness outfit with authentic TikTok Shop UGC body movements.

She performs subtle weight shifts, small natural steps, gentle hip and leg movements and relaxed body rotations.

Using ONLY her FREE HAND, she naturally runs her hand across the garment, briefly touches the waistband and smooths the fabric to demonstrate its fit, texture and construction.

The smartphone remains continuously held in the SAME hand.

COLOR TRANSITIONS:

As the model naturally moves, the garment changes through the EXACT referenced colors ONE BY ONE.

Each color change must be quick, clean and visually clear.

COLOR 1 → COLOR 2 → COLOR 3 → COLOR 4, continuing only for the number of colors actually provided in the references.

CRITICAL:

ONLY THE COLOR CHANGES.

During every transition, the garment's geometry and construction remain completely locked.

The waistband stays identical.
The seams stay identical.
The stitching stays identical.
The logo stays identical.
The fabric texture stays identical.
The fit stays identical.
The garment length stays identical.
Every detail remains in exactly the same position.

The model's body, proportions, skin tone, accessories and environment also remain unchanged.

There must be ZERO garment morphing between colors.

MOVEMENT DURING COLOR CHANGES:

Synchronize each color change with a small natural body movement, such as:

subtle weight shift → color change

small hip rotation → color change

free hand smoothly passing across garment → color change

small natural step → color change

The transitions feel dynamic and engaging while preserving realistic continuous human movement.

FINAL:

After the final referenced color appears, she briefly runs her FREE HAND across the garment.

She takes one subtle step backward and naturally places her free hand near the waist.

She then clearly POINTS DOWNWARD toward the bottom of the screen with her FREE index finger, naturally indicating the TikTok Shop product link/cart below.

The smartphone remains in the SAME hand.

Hold the final CTA pose briefly.

CAMERA:

Authentic smartphone UGC footage.

Vertical 9:16.
Strictly neck-down framing.
Natural handheld micro-movement.
Realistic autofocus.
Natural exposure.
Realistic lighting and shadows.
Realistic fabric physics.
No digital zoom.
No cuts.
No scene changes.
No artificial camera movement.

PORTUGUESE FEMALE VOICEOVER:

Use a natural, confident adult female Brazilian Portuguese voice.

Say exactly:

“Não usa esse conjunto se você não quer que perguntem se você usou anabolizante para ficar com essa bunda GG. Além de modelar o corpo, vai te deixar uma grande gostosa. Confere no carrinho.”

The voice is voiceover only.

The model's face remains outside the frame throughout the entire video.

No visible lip-sync is required.

VISUAL STYLE:

Ultra-realistic.
Authentic TikTok Shop UGC.
Premium fitness fashion presentation.
Real smartphone appearance.
Highly detailed fabric.
Realistic body movement.
Realistic garment physics.
Natural lighting.
No AI-generated appearance.

NEGATIVE PROMPT:

visible face, visible head, visible chin, partial face, accidental face reveal, camera framing above neck, phone released, phone changing hands, phone disappearing, both hands interacting with garment, garment redesign, garment shape change, changed stitching, changed seams, changed waistband, changed logo, changed print, changed fit, changed length, changed fabric texture, invented colors, wrong colors, mixed colors, gradient color transition, garment morphing, clothing transformation, body morphing, environment change, extra fingers, deformed hands, unrealistic anatomy, floating fabric, CGI appearance, AI artifacts, digital zoom, cuts, scene transitions, subtitles, text, watermark.

—----------

Método gringo TRANSIÇÃO - faceless shop 2

💡

USE SEMPRE A FOTO DO PESCOÇO PARA BAIXO + A SEGUNDA IMAGEM COM A ROUPA QUE QUER A TRANSIÇÃO.

Create a 10-second ultra-realistic vertical 9:16 transformation video using the provided reference images.

REFERENCE IMAGE 1:
Defines the model, exact shaker bottle, initial clothing, environment, lighting, camera angle, framing, visible body proportions and all other visible details.

REFERENCE IMAGE 2:
Defines ONLY the EXACT FINAL OUTFIT that MUST replace the initial outfit during the hidden transition.

This prompt must work with ANY model, ANY shaker bottle, ANY initial outfit, ANY final outfit and ANY environment.

ABSOLUTE NECK-DOWN FRAMING:

The model is shown STRICTLY FROM THE NECK DOWN throughout the ENTIRE video.

The head, face, chin and all facial features remain completely outside the frame at all times.

NEVER reveal the face, including during movement, transition, squat or approach.

ABSOLUTE PHONE LOCK:
The model holds the smartphone in ONE HAND during the ENTIRE video.

She NEVER releases the phone.
She NEVER switches hands.
She NEVER puts the phone down.

The SAME hand continuously holds the recording smartphone from the first frame until the final frame.

The OTHER hand is the FREE HAND.

All actions involving the shaker, garment and CTA are performed ONLY with the FREE HAND.

ABSOLUTE REFERENCE CONSISTENCY:
Preserve the EXACT same model and visible body proportions throughout.

Preserve the EXACT shaker from Reference Image 1.

Preserve the exact environment, lighting, perspective, camera position and background.

BEFORE THE TRANSITION:
The model MUST wear ONLY the original clothing from Reference Image 1.

AFTER THE TRANSITION:
The model MUST wear ONLY the exact outfit from Reference Image 2.

THE WARDROBE CHANGE IS MANDATORY.

[0–2 SECONDS — SHAKER]

The model is already standing.

One hand continuously holds the smartphone.

Using ONLY her FREE HAND, she holds the exact shaker from Reference Image 1.

She quickly shakes the shaker several times with realistic wrist, arm and liquid movement.

She then immediately pushes the shaker toward the smartphone camera lens.

[2–3 SECONDS — MANDATORY WARDROBE TRANSFORMATION]

Using ONLY her FREE HAND, she pushes the shaker DIRECTLY into the camera lens.

The shaker moves closer until it COMPLETELY COVERS 100% OF THE ENTIRE FRAME.

CRITICAL TRANSITION:

The shaker MUST physically cover the entire camera view.

The screen becomes completely blocked by the shaker.

AT THE EXACT MOMENT OF 100% LENS COVERAGE:

INSTANTLY REMOVE THE ENTIRE INITIAL OUTFIT FROM REFERENCE IMAGE 1 AND REPLACE IT WITH THE COMPLETE EXACT OUTFIT FROM REFERENCE IMAGE 2.

THIS CLOTHING CHANGE IS MANDATORY.

REFERENCE IMAGE 2 MUST APPEAR AFTER THE TRANSITION.

DO NOT keep the initial outfit.
DO NOT mix both outfits.
DO NOT transform only one garment if Reference Image 2 contains multiple pieces.
DO NOT omit any piece from Reference Image 2.

Every visible clothing piece defined by Reference Image 2 must be present immediately after the transition.

The transformation occurs INSTANTLY while the lens is completely hidden.

NO visible morphing.
NO gradual clothing change.
NO clothing appearing piece by piece.
NO floating clothing.
NO transition effect.

The sequence MUST be:

ORIGINAL OUTFIT
→ shaker covers 100% of lens
→ INSTANT COMPLETE OUTFIT REPLACEMENT
→ shaker moves away
→ EXACT REFERENCE IMAGE 2 OUTFIT IS ALREADY FULLY WORN.

When the shaker moves away from the lens, the wardrobe transformation is ALREADY COMPLETE.

The initial outfit must be completely gone.

The final outfit must exactly match Reference Image 2.

The smartphone is STILL being held in the SAME hand.

After revealing the new outfit, the shaker naturally leaves the visible frame through the FREE HAND.

[3–4 SECONDS — REACTION]

Immediately after the reveal, she reacts to the new outfit using energetic body language.

She briefly angles her upper body downward as if checking the transformation.

Using her FREE HAND, she makes one quick excited gesture near the upper garment.

The phone remains firmly held in the SAME hand.

The face remains outside the frame.

[4–5 SECONDS — PLAYFUL POSE]

She makes one quick confident gym-style pose using ONLY her FREE ARM.

The other arm remains occupied holding the smartphone.

Natural athletic body language.
Realistic anatomy.

[5–6 SECONDS — SHOW FINAL OUTFIT]

Using ONLY her FREE HAND, she naturally runs her hand across the NEW outfit.

She physically touches and smooths the fabric, showing its fit, texture and construction.

The exact Reference Image 2 outfit MUST remain unchanged.

[6–8 SECONDS — TURN + SQUAT]

She smoothly rotates to show the side/rear presentation of the NEW outfit.

She performs ONE quick controlled squat:

standing → smooth descent → brief bottom position → immediate rise.

Realistic hip, knee and leg movement.

The phone remains continuously held in the SAME hand.

The free hand may naturally rest against or interact with the garment.

The NEW outfit moves with realistic fabric physics.

She returns completely to standing.

[8–10 SECONDS — APPROACH + CTA]

She turns toward the mirror/camera and quickly moves closer.

The framing becomes closer to the upper section of the NEW outfit while remaining STRICTLY BELOW THE NECK.

Her face NEVER enters the frame.

Using ONLY her FREE HAND, she briefly smooths or touches the new garment.

She then takes a slight step backward and clearly POINTS DOWNWARD toward the bottom of the screen with her FREE index finger.

She finishes in a confident garment-showcase pose.

The smartphone remains firmly in the SAME hand until the final frame.

FINAL OUTFIT ABSOLUTE LOCK:
REFERENCE IMAGE 2 is the ONLY source of truth for the clothing after the transition.

Preserve EXACTLY:
color, fabric, texture, print, graphics, logos, cut, neckline, straps, sleeves, waistband, pockets, seams, fit, proportions, length, hems and every visible detail.

DO NOT reinterpret Reference Image 2.

If Reference Image 2 contains multiple clothing pieces, ALL pieces must replace their corresponding original clothing simultaneously during the hidden transition.

CRITICAL PRIORITY:
1. PHONE NEVER LEAVES THE SAME HAND.
2. FACE NEVER ENTERS THE FRAME.
3. SHAKER COVERS 100% OF THE LENS.
4. COMPLETE WARDROBE CHANGE HAPPENS WHILE LENS IS COVERED.
5. AFTER REVEAL, MODEL MUST BE WEARING EXACTLY REFERENCE IMAGE 2.
6. INITIAL OUTFIT MUST NOT REMAIN AFTER THE TRANSITION.

Vertical 9:16.
Ultra-realistic smartphone footage.
Single continuous shot.
Realistic fabric physics.
Realistic human movement.
No digital zoom.
No cuts.
No scene changes.
No text.
No subtitles.
No audio.
No watermark.

NEGATIVE:
face visible, head visible, chin visible, accidental face reveal, phone released, phone changing hands, phone put down, initial outfit remaining after transition, failed wardrobe change, incomplete wardrobe change, only one clothing piece changing, mixed outfits, wrong final outfit, altered final outfit, transformation before full lens coverage, visible morphing, gradual transformation, floating clothes, shaker failing to cover entire frame, changed environment, body deformation, extra fingers, AI artifacts, CGI appearance.

deixe sempre do angulo do pescoço para baixo

VIDEO PROMPT — ULTRA REALISTIC | MIRROR SELFIE | STRICT NECK-DOWN | GARMENT DETAIL | 9:16

Create an ultra-realistic vertical 9:16 mirror-selfie UGC fashion video using the provided reference image as the ONLY visual source.

REFERENCE LOCK:
Preserve exactly the same visible model, body proportions, garment, accessories, environment, lighting, reflections, colors, fabric, texture, stitching, seams, fit, silhouette, length and every visible detail.

Do not redesign, reinterpret or modify the garment.

ABSOLUTE NECK-DOWN FRAMING:
The model must remain STRICTLY framed FROM THE NECK DOWN throughout the ENTIRE video.

The head, face, chin, mouth, nose, eyes and all facial features must remain completely OUTSIDE the top edge of the frame.

The face must NEVER appear, even partially or in the mirror reflection.

This applies during every step, close-up, turn and final pose.

PHONE LOCK:
The smartphone remains in the SAME HAND throughout the entire video.

She NEVER releases it.
She NEVER switches hands.
She NEVER puts it down.

The other hand is the FREE HAND used for all garment interactions.

START:
Begin from the same body position and orientation as the reference, but maintain STRICT neck-down framing.

She stands naturally in front of the mirror while continuously holding the smartphone in one hand.

Natural breathing, relaxed shoulders and subtle body micro-movements.

APPROACH:
After a brief pause, she calmly walks toward the mirror with three to four slow, natural steps.

As she approaches, the hand holding the phone naturally moves higher and closer to the mirror to show the garment details.

The framing becomes progressively tighter ONLY through her physical movement and phone positioning.

NO digital zoom.

CRITICAL:
As she approaches, the camera remains aimed BELOW THE NECK.

The camera must NEVER continue upward toward the face.

CLOSE-UP:
Once close to the mirror, create a tight garment close-up centered on the UPPER SECTION OF THE CLOTHING while still remaining strictly below the neck.

Show the neckline, straps, upper construction, seams, texture, print, embroidery or other existing details when applicable.

NEVER invent details that are not present.

She makes subtle shoulder and upper-body movements so the fabric naturally catches the light.

Clearly showcase the fabric texture, weave, finish, construction and fit.

The garment remains completely unchanged.

STEP BACK:
She naturally lowers the phone-holding arm slightly while taking two slow steps backward.

The framing smoothly widens through physical movement only.

The phone remains in the SAME hand.

The face remains outside the frame.

SIDE PRESENTATION:
She gently rotates approximately 40 degrees toward one side.

The phone-holding arm naturally follows her body rotation, maintaining realistic handheld selfie camera physics.

Using ONLY her FREE HAND, she reaches toward the lower side of the garment.

If the garment has loose or flowing fabric, she gently lifts a SMALL section and gives it ONE soft natural sway to demonstrate its drape and weight.

If the garment is fitted or has no loose section, she instead gently moves her free hand across the lower fabric without lifting it.

The fabric responds naturally to gravity and settles back into its original position.

THREE-QUARTER POSE:
She releases the fabric and naturally settles into an elegant three-quarter pose.

Using her FREE HAND, she performs one smooth natural gesture across the shoulder, strap or upper side of the garment, keeping the hand and entire action below the neck.

Do not raise the hand toward the face or hair.

FINAL CTA:
After a brief pause, she naturally extends the index finger of her FREE HAND and clearly POINTS DOWNWARD toward the bottom center of the frame.

The gesture is relaxed, subtle and authentic, like indicating a product link below the video.

She holds the downward pointing gesture for approximately three seconds.

The smartphone remains in the SAME hand throughout.

The garment remains clearly visible.

The face and head remain completely outside the frame until the final frame.

CAMERA PHYSICS:
Authentic handheld smartphone mirror-selfie recording.

Every framing change comes from the physical movement of the model and the arm holding the phone.

Subtle natural micro-shake.
Smooth autofocus.
Natural exposure.
Realistic mirror reflections.
Natural smartphone perspective.

NO digital zoom.
NO lens switching.
NO cuts.
NO transitions.
NO floating camera.
NO automatic tracking.

NO robotic camera movement.

MOTION:
Natural breathing.
Relaxed shoulders.
Realistic body micro-adjustments.
Subtle hip movement.
Smooth weight transitions.
Natural imperfect human timing.

No dancing.
No runway walking.
No exaggerated posing.
No robotic movement.

FABRIC PHYSICS:
Realistic weight, gravity, folds, tension, drape and secondary movement.

No floating fabric.
No exaggerated stretching.
No clothing transformation.
No permanent deformation.

CRITICAL RULES:
STRICTLY NECK-DOWN DURING THE ENTIRE VIDEO.
FACE NEVER APPEARS.
HEAD NEVER APPEARS.
NO FACE IN MIRROR REFLECTION.
PHONE ALWAYS REMAINS IN THE SAME HAND.
NEVER RELEASE OR SWITCH THE PHONE.
ONLY THE FREE HAND INTERACTS WITH THE GARMENT.
PRESERVE THE EXACT ORIGINAL GARMENT.

NO dialogue.
NO narration.
NO music.
NO lip-sync.
NO text.
NO subtitles.

NO watermark.

NEGATIVE:
visible face, partial face, visible head, visible chin, facial reflection, accidental face reveal, camera framing above neck, camera tilting toward face, phone changing hands, phone released, phone disappearing, both hands touching garment, altered garment, changed color, changed print, changed logo, invented garment details, exaggerated fabric lifting, floating fabric, clothing morphing, body deformation, extra fingers, distorted hands, fixed camera, floating camera, automatic tracking, digital zoom, lens switching, cuts, transitions, flickering, exposure shifts, AI artifacts, CGI appearance.

Método gringo - Faceless Shop 2

💡
mantenha sempre do pescoço para baixo

VIDEO PROMPT — ULTRA REALISTIC | MIRROR SELFIE | STRICT NECK-DOWN | GARMENT SHOWCASE | 9:16 | 10 SECONDS

Create an ultra-realistic 10-second vertical 9:16 mirror-selfie UGC fashion video using the uploaded reference image as the ONLY source of truth.

Preserve exactly the same visible model, body proportions, garment, colors, fabric, texture, stitching, seams, fit, silhouette, waistband, pockets, prints, logos, accessories, environment and lighting.

Do not redesign, modify or reinterpret the garment.

ABSOLUTE NECK-DOWN FRAMING:

The model must be shown STRICTLY FROM THE NECK DOWN during the ENTIRE 10-second video.

The head, face, chin, mouth and all facial features must remain completely OUTSIDE the top edge of the frame.

The face must NEVER appear, not even partially or in the mirror reflection.

During steps, approaches, turns and body movements, continuously maintain the framing below the neck.

Never tilt upward toward the face.

PHONE LOCK:

The model holds the smartphone in ONE HAND throughout the ENTIRE video.

The phone ALWAYS remains in the SAME hand.

She NEVER releases it.
She NEVER switches hands.
She NEVER puts it down.

All interactions with the garment are performed ONLY with the FREE HAND.

FRAME 1 — 0–2.5s

The model stands naturally facing the mirror, strictly framed from the neck down.

One hand continuously holds the smartphone.

Her FREE HAND rests naturally inside the garment pocket, if a pocket is present.

If the garment has no pocket, the free hand rests naturally beside the hip.

She gently shifts her weight from one leg to the other.

She naturally crosses one leg slightly in front of the other.

The garment softly sways with realistic gravity and natural fabric physics.

The phone remains firmly in the SAME hand.

FRAME 2 — 2.5–5s

She slowly takes a few natural steps toward the mirror.

The framing naturally becomes closer ONLY because her body and the phone physically move closer to the mirror.

NO digital zoom.

IMPORTANT:
As she approaches, the camera remains aimed at the CLOTHING and strictly below the neck.

The face must NEVER enter the frame.

Using ONLY her FREE HAND, she gently slides her hand across the waistband and upper hip area of the garment.

She lightly touches the waistband or corresponding upper section of the garment, naturally emphasizing its fit and construction.

She briefly pauses while keeping the clothing clearly visible.

FRAME 3 — 5–7.5s

She slowly rotates her body approximately 30 degrees toward one side.

The hand and arm HOLDING THE PHONE naturally move together with her body rotation, maintaining a physically realistic mirror-selfie perspective.

The camera must NOT remain artificially fixed while she turns.

Using ONLY her FREE HAND, she naturally slides her hand from the waist toward the upper thigh.

The angled side view naturally highlights the garment's silhouette, fit and construction.

The fabric forms soft realistic folds and responds naturally to the body movement.

The face and head remain completely outside the frame throughout the rotation.

FRAME 4 — 7.5–10s

She smoothly rotates back to face the mirror.

The phone-holding arm naturally returns together with her body.

She takes ONE small natural step backward.

Her FREE HAND returns inside the pocket, if the garment has one.

If no pocket exists, the hand rests naturally beside the hip.

She subtly shifts her weight once more.

The fabric gently settles under its own weight with realistic cloth physics.

She finishes in a relaxed natural influencer-style pose and remains still for the final moment.

CAMERA PHYSICS

Authentic handheld smartphone mirror-selfie recording.

The phone is physically held by the model throughout the entire take.

Every camera movement must result naturally from the movement of the hand, arm and body holding the phone.

Natural handheld micro-shake.
Small realistic framing corrections.
Smooth autofocus.
Natural exposure.
Realistic mirror reflections.
Authentic smartphone perspective.

NO digital zoom.
NO fixed floating camera.
NO automatic tracking.
NO robotic camera.
NO cuts.
NO transitions.

CRITICAL RULES

STRICTLY NECK-DOWN FOR ALL 10 SECONDS.

FACE NEVER APPEARS.

HEAD NEVER APPEARS.

NO FACIAL REFLECTION.

PHONE ALWAYS REMAINS IN THE SAME HAND.

NEVER RELEASE OR SWITCH THE PHONE.

ONLY THE FREE HAND INTERACTS WITH THE GARMENT.

PRESERVE THE EXACT ORIGINAL GARMENT.

NO invented pockets or garment details.

NEGATIVE PROMPT

visible face, partial face, visible head, visible chin, visible mouth, facial features, accidental face reveal, face in mirror reflection, camera tilting upward, framing above neck, phone changing hands, phone released, phone disappearing, both hands touching garment, invented pocket, invented garment details, altered clothing, changed colors, changed prints, changed logos, stretched fabric, deformed fabric, unrealistic anatomy, extra fingers, deformed hands, floating camera, fixed camera, automatic tracking, robotic movement, digital zoom, cuts, transitions, AI artifacts, CGI appearance, text, subtitles, watermark.

—----------

–

Método gringo - faceless shop 4

💡
mantenha sempre o angulo do pescoço pra baixo

Create an ultra-realistic vertical 9:16 UGC fashion video that looks genuinely recorded with the FRONT-FACING CAMERA of an iPhone 15 Pro Max.

The uploaded reference image is the ONLY source of truth.

REFERENCE LOCK:
Preserve exactly the same person, visible body proportions, clothing, accessories, environment, lighting, colors, fabric, fit, texture, seams, prints, logos and every visible garment detail.

Do not redesign, replace or modify anything.

ABSOLUTE FRAMING:
The person records herself continuously while holding the iPhone in ONE HAND.

The recording phone ALWAYS stays in the SAME hand.
She NEVER releases it and NEVER switches hands.

The phone itself NEVER appears inside the recorded frame.

Show the person STRICTLY FROM THE NECK DOWN.
The face, head and facial features NEVER enter the frame.

All clothing interaction is performed ONLY with the FREE HAND.

CAMERA POSITION:
The phone is physically held by the person slightly above her body and naturally angled downward toward the outfit.

The camera is NOT fixed and NOT externally operated.

Every camera movement MUST be physically caused by the natural movement of the hand and arm holding the iPhone.

MOVEMENT 1 — FRONT:
She begins naturally showing the FRONT of the outfit.

The handheld framing has subtle realistic micro-shake and small imperfect adjustments caused by her arm.

MOVEMENT 2 — TURN:
She naturally rotates her body toward one side.

She does NOT turn completely backward.

At the same time, the arm holding the iPhone physically rotates WITH her body.

The camera viewpoint therefore naturally follows the turn while continuously keeping the garment framed.

This must look exactly like someone filming herself with a front-facing smartphone camera while turning her body.

No floating camera.
No automatic tracking.

MOVEMENT 3 — SIDE / BACK DETAIL:
She turns only enough to naturally reveal the SIDE and visible REAR portion of the garment without fully presenting her back to the camera.

While holding this angled position, she uses her FREE HAND to smoothly run her hand ONCE across the rear/side fabric.

The gesture naturally demonstrates the garment's fabric, details, fit and drape.

Do not invent garment details that are not present in the reference.

MOVEMENT 4 — RETURN FRONT:

She naturally rotates back toward the original front-facing position.

The hand and arm holding the phone rotate back together with her body, causing the camera viewpoint to naturally return to the front.

MOVEMENT 5 — FRONT DETAIL:
Once facing forward again, she uses her FREE HAND to smoothly run her hand ONCE across the front fabric.

She then makes ONE small, natural adjustment to the lower section of the garment.

The adjustment must be subtle and appropriate for whatever garment is present.

The clothing immediately maintains its original shape and fit.

MOVEMENT STYLE:
Continuous, quick and natural real-time movements.
Authentic everyday UGC behavior.
Natural body rotation.
Natural arm movement.
Subtle body sway.
Realistic breathing.
Small handheld imperfections.

NO slow motion.
NO exaggerated posing.
NO robotic movement.

CRITICAL CAMERA PHYSICS:
The camera MUST behave like a real iPhone physically held in the person's hand.

When her body turns, her phone-holding arm turns with her and the camera perspective changes accordingly.

When she returns to the front, the camera naturally returns with her arm.

The camera must NEVER remain stationary while the body rotates.

NEVER simulate a tripod, ceiling camera, floating camera, drone, gimbal, external operator or automatic subject tracking.

CAMERA:
iPhone 15 Pro Max front-facing camera look.
Authentic smartphone UGC quality.
Natural autofocus.
Natural exposure.
Realistic smartphone HDR.
Natural handheld micro-shake.
Small framing imperfections.
No digital zoom.
One continuous take.

ABSOLUTE RULES:
Phone ALWAYS in the SAME hand.
Phone NEVER visible in the footage.

Only the FREE HAND interacts with the garment.
Face and head NEVER visible.
Never turn completely backward.
Preserve the exact garment.
Preserve the original environment.

NO dialogue.
NO narration.
NO audio.
NO music.
NO lip sync.
NO cuts.
NO transitions.
NO scene changes.

NEGATIVE:
visible face, visible head, visible chin, facial features, accidental face reveal, phone visible, phone changing hands, phone released, two phones, fully turned back, full back-facing pose, fixed camera, floating camera, ceiling camera, third-person camera, external camera operator, automatic tracking, robotic tracking, gimbal movement, cinematic orbit, digital zoom, slow motion, altered garment, changed colors, changed print, changed logo, invented garment details, stretched fabric, deformed fabric, unrealistic anatomy, extra fingers, deformed hands, AI artifacts, CGI appearance, cuts, transitions, text, subtitles, watermark.

💡
mantenha sempre mesmo angulo sem rosto

Create an ultra-realistic vertical 9:16 UGC-style fashion video that looks genuinely recorded with the FRONT-FACING CAMERA of an iPhone 15 Pro Max.

The uploaded reference image is the ONLY source of truth.

REFERENCE LOCK:
Preserve exactly the same person, visible body proportions, clothing, accessories, environment, lighting, colors, fabric, fit, prints, logos, seams, texture and every visible detail from the reference.

Do not redesign, modify or reinterpret the clothing.

ABSOLUTE FRAMING:
Start EXACTLY from the pose, position and framing shown in the reference image.

The video must show the person ONLY FROM THE NECK DOWN.

The face and head NEVER enter the frame at any moment.

The person is holding the iPhone in ONE HAND and recording herself continuously with its FRONT-FACING CAMERA.

She NEVER releases the phone.
She NEVER switches the phone to the other hand.
The recording phone itself NEVER appears inside the captured image.

All interaction with the clothing is performed with the FREE HAND.

MOVEMENT:

Starting from the exact reference framing, she naturally and gradually LOWERS the hand holding the phone.

Because she is physically lowering the phone while continuously filming herself with the front-facing camera, the camera viewpoint naturally travels downward over her outfit.

This must look like authentic handheld selfie recording, NOT an artificial camera pan.

The framing gradually moves downward until the outfit is visible to approximately the LOWER THIGH area.

NEVER frame the body below the thighs.

She briefly shows this lower framing and then naturally raises the phone again, returning to a slightly higher and closer view of the clothing.

Immediately after returning upward, she uses her FREE HAND to gently PRESS the lower garment once, lightly pushing the fabric to demonstrate its fit and natural structure.

She then naturally runs the same free hand across the garment ONCE, smoothly flattening the fabric and showing its texture, fit and construction.

The fabric reacts naturally to her hand and immediately maintains its original shape.

MOVEMENT STYLE:
All movements are quick, spontaneous, smooth and natural, like a real everyday UGC fashion video.

Natural handheld micro-shake.
Small imperfect hand adjustments.
Natural body sway.
Realistic breathing.
Authentic smartphone movement.

Do NOT make the camera movement look cinematic, robotic, stabilized or professionally operated.

CAMERA:
iPhone 15 Pro Max front-facing camera look.
Authentic smartphone image quality.
Natural autofocus.
Natural exposure.
Realistic smartphone HDR.
Subtle sensor noise.
Natural handheld imperfections.
No digital zoom.
No artificial camera movement.
One continuous take.

IMPORTANT:
The phone stays in the SAME HAND throughout the entire video.
She is ALWAYS recording herself using the FRONT-FACING CAMERA.
The recording phone NEVER becomes visible in the footage.
Only the FREE HAND touches the clothing.
The face NEVER appears.
Never show below the thighs.

NO dialogue.
NO narration.
NO words.
NO music.
NO audio.
NO lip sync.
NO cuts.
NO transitions.
NO scene changes.

NEGATIVE:
visible face, visible head, visible chin, facial features, accidental face reveal, phone visible in footage, phone changing hands, releasing phone, two phones, third-person camera, external camera operator, camera below thighs, legs below thighs visible, feet visible, digital zoom, cinematic camera movement, robotic movement, gimbal movement, altered clothing, changed

colors, changed print, changed logo, invented garment details, stretched fabric, deformed fabric, extra fingers, deformed hands, unrealistic anatomy, AI artifacts, CGI appearance, cuts, transitions, text, subtitles, watermark.

💡

use sempre o mesmo angulo do pesçoco para baixo

VIDEO PROMPT — ULTRA REALISTIC | MIRROR SELFIE | NECK-DOWN | FABRIC & DETAIL SHOWCASE | 9:16 | 4K

Create an ultra-realistic vertical 9:16 mirror-selfie UGC fashion video using the uploaded reference image as the ONLY source of truth.

ABSOLUTE REFERENCE LOCK:
Preserve exactly the model's visible body proportions, garment, colors, fabric, texture, stitching, seams, fit, silhouette, length, graphics, prints, logos, embroidery, labels and every visible clothing detail.

Do not redesign, replace, reinterpret or modify the garment.

ABSOLUTE NECK-DOWN FRAMING:
The model is shown STRICTLY FROM THE NECK DOWN throughout the ENTIRE video.

The head, face and facial features must NEVER enter the frame, including during closer movements.

PHONE LOCK:
The smartphone remains clearly visible in the SAME HAND throughout the entire video.

Never switch hands.
Never put the phone away.
Never let it disappear.

ALL garment interactions are performed ONLY with the FREE HAND.

OPENING:
The model begins standing naturally in front of the mirror with the garment clearly visible.

She smoothly takes a small step closer to the mirror while naturally bringing the smartphone closer.

This creates an organic close-up of the upper garment while keeping the framing strictly below the neck.

MOVEMENT 1 — TOUCHING THE GARMENT:
With her FREE HAND, she slowly runs her palm across the front of the upper garment.

She gently presses and smooths the fabric with her hand, naturally demonstrating its texture, fit and softness.

MOVEMENT 2 — FABRIC DEMONSTRATION:
She naturally pinches a small section of the fabric between her fingers.

She gently pulls the fabric outward a few centimeters to clearly demonstrate its thickness, flexibility, texture and construction.

She briefly holds it, then releases it.

The fabric naturally returns to its original shape without stretching or deformation.

MOVEMENT 3 — DETAILS:
Remaining close to the mirror, she uses her FREE HAND to naturally draw attention to any important visible garment details.

If the garment contains a print, graphic, logo, embroidery, stitching, texture, buttons, zipper, seams or other distinctive details, she gently touches, traces or points toward them.

The camera naturally captures these details clearly.

If no special detail exists, she simply continues smoothing and lightly touching the fabric.

NEVER invent details that are not present in the reference image.

ENDING:
After showing the garment details, she takes one small natural step backward, creating a slightly wider view of the outfit.

The smartphone remains visible in the SAME hand.

With her FREE HAND, she clearly extends her index finger and POINTS DOWNWARD toward the bottom center of the frame.

She holds the downward pointing gesture briefly in a natural TikTok Shop CTA pose.

The face remains completely outside the frame until the final frame.

CAMERA:
Authentic handheld mirror-selfie smartphone footage.
Natural micro-shake.
Smooth autofocus.
Organic movement.
No digital zoom.
No cuts.
No transitions.
No sudden camera movement.
Never tilt upward toward the face.

HUMAN MOVEMENT:
Natural breathing.
Realistic posture.
Subtle body sway.
Smooth hand movements.
Natural influencer-style product demonstration.
No dancing.
No exaggerated posing.

VISUAL QUALITY:
Ultra realistic.
Authentic smartphone footage.
4K detail.
Realistic skin texture.
Highly detailed fabric.
Realistic fabric physics.
Natural lighting.
Realistic shadows.
No CGI or AI-generated appearance.

AUDIO:
Natural fabric sounds.
Subtle movement sounds.
Quiet ambient sound.
No narration.
No music.

NEGATIVE PROMPT:
visible face, visible head, visible chin, facial features, accidental face reveal, facial reflection, framing above neck, camera tilting upward, phone disappearing, phone changing hands, phone leaving frame, two phones, invented garment details, invented print, altered print, altered logo, changed colors, modified garment, stretched fabric, permanently deformed fabric, melted fabric, extra fingers, missing fingers, deformed hands, unrealistic anatomy, AI artifacts, CGI appearance, abrupt movements, digital zoom, cuts, transitions, text, subtitles, watermark.
